

This year Roland Berger celebrates 30 years of activity in Romania, being the first strategy consulting company on the local market.

One of the hallmarks of Roland Berger in these 30 years has been the recruitment of exceptional young professionals, which has led to the creation of successful teams over the years. Most of Roland Berger's consultants have joined the company during their studies, in internship programs, or immediately after graduating from academic programs at top universities around the world, with various fields of study, such as economics, business, engineering or IT.

To mark the 30 years since we have been present on the Romanian market, we offer a new opportunity to youngsters interested in the field of strategic management consulting: 1 Year Mentoring Program with Roland Berger Romania.

You will be a part of a 1-year guiding program: exceptional students will benefit from personal & professional development support from experienced strategy consulting professionals.

Throughout the formal monthly mentor-mentee meetings, as well as the informal support during the entire year, this program is expected to increase mentees' overall understanding of the strategy consulting industry and roles and of the business environment in general, while also providing them with career development tools and resources to accomplish future goals and milestones.
