

## VACANCY – BUSINESS ANALYST

Are you an expert in making business analyses? Do you have a critical and technical mindset? Do you like to make the functional and technical translation between Business & IT? Then you are the person we are looking for our vacancy Business Analyst.

### **What are your responsibilities?**

- You are the bridge between Business & IT.
- You define the needs together with the customer and end-users and translate them into User stories which results in a detailed specification or product backlog of the solution.
- You are the liaison with the NS developer to discuss and elaborate on the functionalities during the development phase.
- You constantly consult with the various stakeholders during the project lifecycle.
- You have experience in datamodelling.
- You participate in the testing project and are able to guide and support the client during the user acceptance testing.
- You are able to manage the scope, the deliverables and the quality during the project lifecycle.
- You propose solutions towards the customers where the customer needs and priorities are aligned with the possibilities of the Normalized Systems Methodology.

### **Who are we looking for?**

- You preferably have 3 years experience within the business analysis of functional analysis domain and hold a master's degree in Business Engineering: Management Information Systems, ICT, Commercial Sciences or Applied Economics.
- You get motivation from changing environments, you are proactive, flexible and can work autonomously.
- You like both abstract and technical challenges.
- You always think 3 steps ahead and consider innovation to be of high importance.

- You have a healthy portion of ambition and you are prepared to step out of your comfort zone.
- You have an IT-technical affinity and are willing to search for new challenges and solutions in the software domain.
- You are multilingual.
- Willingness to travel.

### **What does NSX offer you?**

- NSX allows you to evolve further in your career at your own pace and offers you the opportunity to realize your professional dreams in line with your ambitions and capabilities.
- You will be part of a young and enthusiastic team within an innovative company.
- Variety of projects, challenges and continuous on-the-job learning.
- A competitive salary package including fringe benefits.

### **Something for you?**

Present yourself and convince us that you belong in our team. Apply today to this vacancy and who knows, maybe you will strengthen our team soon!

You can apply by e-mailing your resume and motivation letter to [jobs@nsx.normalizedsystems.org](mailto:jobs@nsx.normalizedsystems.org)
