

Internship Product Engineering

About Konligo

Konligo – a young VUB spin-off located in Brussels – makes it possible for creative event managers to stand out during events, for themselves and their clients, with **creative and adaptable structures**.

The stands and tents bring an impressive immersive feeling and are installed very fast (hours instead of days).

We believe that tomorrow events will bring more with less: more immersive, eye-catching and authentic experiences, with less waste, resource depletion and setup time.

With our innovative transformable structures, we want to fascinate and inspire you.

To achieve this, we combine creative engineering with the principles of sustainable development. We push structures to another level whilst continuing to strive for resource efficiency, and acting responsibly.

Don't forget watch our video!

Job description

You are looking for

- 1) A thrilling and educational adventure in a startup
- 2) A nice, fun, small and multilingual team
- 3) A varied assignment
- 4) A clear mission: let's change the stand building world with beautiful and reusable structures, 100% made in Belgium

This is what we expect of you:

- An internship of at least 40 or 60 working days (hence at least 8 or 12 weeks for 5 days/week internships)
- Performing structural calculations on our structures
- Product development of new/existing structures
- Edit technical drawings and renders
- Hands-on assembly and finishing work of our products and smaller scale models
- Coordination of our storage and assembly facility (like stock inventory..)
- Optimising the operational process and supply chain: calculations, production, assembly.

Wanted profile

The job is suitable for (architectural/industrial) engineers with an interest in construction/mechanics. However, we are more interested in your personality, motivation to contribute to the Konligo story and your perseverance to have an impact. In addition, we seek following competences:

- Interested and experience in construction/mechanical topics
- Interested in assembly work
- Organised, like to work independently and takes initiative
- Motivated and flexible

We offer

- A unique opportunity to participate in the development of a young and growing startup in a challenging sector.
- A diversified and valorised assignment that has a real impact on the growth of Konligo.
- Homework once every two weeks is possible.

Interested?

Make sure your profile pops out by sending us a topping motivation letter. We contact you as soon as possible.
