

# LOOKING FOR AN INTERNSHIP IN 3D BIOPRINTING?

### WE WANT YOU!

Are you passionate about biotechnology? Do you want to be at the forefront of cutting-edge research and development in the field of 3D bioprinting? We have an exciting opportunity for you!

We are a young and dynamic startup focused on revolutionizing the field of bioprinting. Our mission is to develop innovative biomaterial solutions that will shape the future of tissue engineering and regenerative medicine. As an intern, you will have the chance to work closely with our team of experts and gain hands-on experience in the development of bioinks, for multiple 3D printing technologies!

## WHAT'S IN FOR YOU?

This internship offers an exceptional opportunity to gain practical experience in a fast-paced startup environment and be part of a team that is pushing the boundaries of 3D (bio)printing.

- You will assist in the formulation development and the bioink optimization for various 3D (bio)printers.
- You will conduct experiments to evaluate the performance and properties of various bioinks.
- You will contribute to the generation of printed structures towards specific applications.
- You will collaborate with team members on various projects and provide support as needed.

#### Requirements:

- Currently pursuing a degree in biotechnology, biomedical engineering, materials science, or a related field.
- Strong interest in bioprinting, biofabrication, tissue engineering or regenerative medicine.
- Ability to work independently as well as collaboratively in a team environment.
- Strong communication and organizational skills. Fluent in English.

If you are eager to make a difference in the field of 3D biofabrication, apply now with your resume and a brief cover letter highlighting your interest in bioprinting and the development of bioinks.
