

---

# Welcome

---

Dear fellow student and future engineer,

As you are reading this introduction, you are probably one amongst many of us who will graduate soon as an engineer. You have most likely heard it and experienced it: we live in a fast paced world. As a future engineer, you are an essential puzzle piece to push innovation in this constantly changing world. In just a few months, your student life will be over and you will start a completely new journey and try to find your way in a new world.

The past semester, we have tried to help you to take the first steps with numerous activities where we built the bridge between you and engaging companies. At our Sector Days, you got to know the different engineering sectors with the many possibilities they have to offer and at our Internshipfair, many steps to a captivating internship were taken. Today, you get to meet over 150 interesting companies at our VTK Jobfair!

For an engineer, the possibilities are almost limitless, as you will soon discover yourself. Therefore, the decision of where to start your career will not be an easy one. Consequently, we hope to make the search for your perfect first job a little easier by assembling these great companies at our Jobfair. For those of you who are not graduating yet this year, other opportunities present themselves at our Jobair. A lot of the companies here today offer the possibility to do an internship or to write a master's thesis in collaboration with the company. Both of which are excellent opportunities to get a taste of life at a company before you choose your first job.

In this Jobguide, you are able to find information about every participating company. Some basic company information, possible job opportunities and a short explanation of the application procedure are provided, together with the contact information to get in touch with the company of your choice.

We wish you the best of luck with finding your perfect first job or internship and taking that leap! Dive deep, aim high and build that bridge to your future!

Cheers,

VTK CAREER & DEVELOPMENT

# PREFACE OF OUR DEAN

Dear student,

To a certain extent human life is a long chain of opportunities, choices and decisions. Some years ago you opted for a specific study programme and during your studies for a specialization, for elective courses, for your master project, etc. Now, being at the end of your studies, your next challenge will be to choose a fulfilling job. Your job will undoubtedly determine a major part of your life, and it is thus a good idea to reflect on this choice and to be well informed. This VTK job fair is one of the different ways to do so and we are grateful to its organizers and sponsors.

Various employers will present themselves during this fair, specifying what they can offer, but also what they expect. Scientific knowledge and technical skills will be important, as well as insight, creativity and solution-oriented thinking. During your education at our faculty of Engineering and Architecture you were extensively trained on all these aspects. In addition, social and communication skills will be assumed, as well as courtesy, sense of responsibility, ethics and so many more values that your parents and those close to you taught you.

With your knowledge, talents and attitudes you will soon make your life choices and work your way, both professionally and privately. Take the opportunity to inform yourself on

your career choice and to compare different types of jobs, different working environments and work styles, different expectations and requirements. Find a job that suits your own talents and skills, but also your wishes and dreams.

This job fair is a nice starting point. Do not only use it to gather information, but also to establish contacts and to have challenging conversations. Do not hesitate to ask any questions you may have. Allow yourself to consider the various possibilities and options to make your first job a success, a milestone in your life and a foundation for your future career.

We wish you a pleasant search, a well-considered choice, a fantastic start in your job and above all a rich and happy lifetime!

On behalf of the faculty of Engineering and Architecture

Patrick De Baets, dean

 **FACULTY OF ENGINEERING  
AND ARCHITECTURE**

# ALUMNI ASSOCIATION

The faculty of Engineering and Architecture takes great pride in her graduates, and is committed to offer its alumni continued support in the upcoming years. Engage is an offspring of the alumni association AIG, which focuses on presenting the young graduates a wide range of activities.

Engage attempts to enrich its members with a variety of cultural events: attending concerts, theatres, comedy nights and even attending a match of (extraordinary) sports. There is something for everyone. By means of different kinds of lectures and workshops Engage also empowers the development of the graduate's knowledge in a way that will improve its personal and professional development.

In his busy daily life an engineer must remember the phrase 'a healthy mind in a healthy body'. Engage offers a variety of sports activities in order to help its members accomplishing this objective. Bowling, karting, golf initiation, archery, wake boarding and fence initiation are just a few of the activities that are organised.

We've all been young and not yet forgotten the good old days. 'Work hard play hard' is a phrase Engage swears by: after-work drinks, new year's receptions, BBQ with afterparty and other festivities will help us relive

our past memories every once in a while. Furthermore allow these social activities to reconnect with formal fellow students and exchange work and life experiences.

AIG, VTK, Hermes, MaChT, Poutrix, PKarus, CenEka and BEAM combine forces in order for you to get the best of multiple worlds. As an Engage member, you get to benefit from the same membership discount for all activities of all student associations and you can participate in all AIG activities with the standard AIG member discount.

**In short: an Engage membership offers plenty of benefits! Visit our website ([aig.ugent.be/engage/](http://aig.ugent.be/engage/)) and follow us on social media for more information and an overview of all activities.**

# WHAT TO ASK?

Don't really know where to start or what to ask to companies? Here is a short guide to aid you in gaining vital insights and inquiring crucial information.

## Understanding yourself

Before engaging with companies, reflect on your preferences and career aspirations. Consider what type of engineering work excites you. This step ensures you can ask specific questions tailored to your aspirations.

- Are you passionate about innovating and developing new technologies?
- Are you interested in the hands-on aspect of engineering, solving problems directly through technical skills?
- Do you see yourself leading projects and teams towards achieving objectives?
- Do you thrive in collaborative team settings, or do you prefer more autonomous, stand-alone projects?
- Do you like a competitive work environment or rather like a homely feeling?
- Do you value regular hours or don't mind the overtime?

## Understanding the company:

Understanding the type of company that fits your career aspirations is just as important as knowing the role you want to play within the engineering field, consider asking about:

### Role and Responsibilities

- "Could you tell me more about the engineering roles currently available?"
- "What are the most important qualities you look for in an engineer?"

### Professional Development and Training

- "Are there opportunities for professional development, such as courses or internal programs?"
- "Is there a special program for young graduates, and how much training can a young graduate expect?"

### Work Environment and Culture

- "Can you describe the company atmosphere? What do you like the most about your job here?"
- "What does an average day look like in your company for someone in this role?"
- "Why did you choose to work for this company, and what has been your career path here?"

### Flexibility and Work-Life Balance

- "How many working hours is a week on average? Are the working hours flexible, and is it possible to work from home?"

### Career Growth and Teamwork

- "Can you talk about career growth opportunities within the company?"
- "Do engineers often work in teams? How does the company foster collaboration and innovation?"

### Application Process and Onboarding

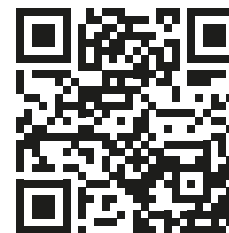

- "What is the application procedure like?"
- "Are there traveling or expat possibilities for engineers within your company?"

# NEED MORE INFO?

### Company Info

Since 2005, as an engineering consultancy for industry and services, we at Abylsen have been exploring new fields of innovation to achieve the objectives we share with our staff, our partners, and the wider world.

Our vocation has remained the same: to support our clients in their innovation, R&D, operational performance and digital projects.

We are present in 8 sectors: Aerospace & Defense, Automotive, Banking & Insurance, Energy, IT & Telecom, Manufacturing/Heavy Industry, Life Science, and Civil Engineering/Construction. We believe that generating value requires collective intelligence. We are constantly seeking fresh perspectives, a new angle, the little sidestep that will enable us to devise innovative solutions, driven by audacity and tailored to meet our customers' priorities.

### Company Info

ACE is een ingenieursbureau, actief in België, Nederland en Polen. Onze Belgische kantoren bevinden zich in Gent en Lummen.

Onze slogan is 'Be Ingenious'. Ingenious is analyseren, ontwikkelen, ontwerpen en realiseren, met het succes van de opdrachtgever als uitgangspunt.

Samen met ons team van ingenious engineers realiseren wij projecten binnen vijf businessunits:

- Constructietechniek
- Industriële Automatisering
- Mechatronica
- Productontwikkeling
- Automotive

Werken mag niet eentonig zijn, zonder uitzicht op functieontwikkeling. Om deze reden hanteren we bij ACE een projectmatige aanpak, waarbij onze medewerkers aan de hand van wisselende uitdagingen hun carrière opbouwen.

### Job options

Wie zijn wij?

ACE is een toonaangevend Europees ingenieurs- en technologiebureau dat sinds 1977 innovatieve technische oplossingen ontwikkelt voor industriële bedrijven. Met meer dan 250 gedreven professionals staan we bekend om onze multidisciplinaire aanpak en onze expertise in mechanica, automatisering, high-tech systemen, productontwikkeling en automotive engineering.

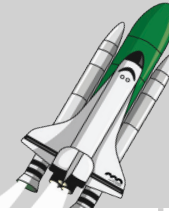

Wat doen we?

Bij ACE werken we samen met klanten van concept tot realisatie. Dat betekent dat we niet alleen ontwerpen en ontwikkelen, maar ook bouwen, testen én installeren — zowel binnen ons eigen ACE-team als rechtstreeks.

#### Company Info

Addestino operates at the intersection of business and technology, providing Strategy, Transformation, and Expert Services — going beyond advisory, all the way to outcomes. Through a close partnership with CIOs, IT leaders, and business executives, Addestino ensures that organizations make the optimal strategic choices until success is delivered. Addestino consultants are top graduates who embed seamlessly within clients' teams. They bring structure, focus, and pace to every engagement, applying a unique methodology that reduces risk and accelerates delivery — faster, smarter, and more effectively.

#### Job options

At Addestino, we offer three career paths:

- Strategy, focusing on high-level business decisions and growth;
- Transformation, driving change and implementing innovative solutions;
- Expert, specializing in deep technical or functional knowledge to provide advanced insights.

Each path allows you to develop unique skills, tackle challenging projects, and grow within a dynamic consulting environment.

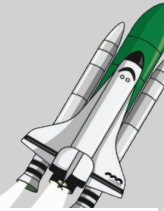

#### Selection procedures

Our selection process is personal and flexible:

- an introductory meeting to share what Addestino does and learn about your background and goals;
- a conversation with a Managing Partner to explore your fit with our DNA;
- a deeper discussion with another Managing Partner on analytical skills and shaping your career path.

Timing is flexible, and one-on-one conversations are key.

When visiting our booth, you will meet our recruitment and business team. If your profile is a match with our activities, you will have an interview with one of our Business Managers in order to discuss your experience as well as our opportunities!

## Arcadis

### Contact

richelle.vanhoute@arcadis.com

### Location

Gent - Berchem - Brussel - Hasselt

### Website

### Employees

Belgium  
950

Worldwide  
36.000

### Company Info

With 36,000 employees worldwide and revenues of 4.2 billion euros, Arcadis is one of the five largest design and engineering companies in the world. In Belgium, we employ 950 colleagues, and we operate in three business areas: infrastructure, buildings and environment. Our people have the flexibility to work from one of our six offices, client construction sites or remotely from home. We specialize in designing sustainable buildings and traffic infrastructure, conducting environmental impact assessments, and managing construction projects from start to finish. We have a wide range of clients from different sectors, including private businesses, government organizations, different industries, contractors, project developers and financial institutions. Together, we develop solutions for sign.

### Job options

Do you want to make an impact with your job and are you ready to get started? At Arcadis, we have opportunities for young professionals in various disciplines. Whether you prefer working on the engineering and design aspects of projects or prefer a hands-on approach, our talent recruiters will help you find the perfect role for you. You will be surrounded by experienced colleagues who are always there to support you, and you will be assigned a mentor during your first months to guide you in your new role.

### Selection procedures

The first step is a telephone interview with our campus recruiter. If this conversation goes well, you will be invited for a meeting with the hiring manager, either at our office or online. A second interview with a member of the team will then follow. If you are successful in these interviews, you can look forward to receiving an offer from us.

## ArcelorMittal

### Company Info

Steel is the foundation of a sustainable world. At ArcelorMittal, we develop innovative steels that are not only powerful and versatile, but also have a positive impact on people and planet. Our high-tech processes drastically reduce energy consumption and CO2 emissions, on top of which steel itself remains endlessly recyclable, with no loss of quality. With applications in electric vehicles, solar panels and wind turbines, our steel plays a key role in the energy transition. But sustainable change requires more than just innovative materials; it also requires entrepreneurial people. That is why all our employees get the chance to develop their talents and build a career within a world leader in the steel industry.

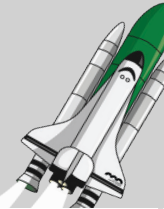

### Job options

- Project Engineer (electrical, mechanical, ...)
- Engineer modelling and automatisisation
- Engineer IT networks
- Engineer data science & modelling

### Selection procedures

### Company Info

Atlas Copco Group enables technology that transforms the future. We innovate to develop products, services and solutions that are key to our customers' success. Our four business areas offer technologies for air and gas compression, vacuum and abatement, automated assembly and quality control, mobile energy management and power generation as well as portable and industrial flow technologies.

### Job options

We offer a wide range of opportunities for students and graduates, including internships, thesis projects and starter positions. Typical profiles we recruit are:

- Engineering and R&D
- Software, data and IT
- Manufacturing and logistics
- Sales, service
- ... and much more

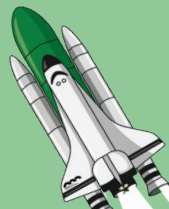

### Selection procedures

At Atlas Copco Group, our slogan for various positions is "hire for attitude & train for skill". We train you for positions through on-the-job-training. Do you only partly meet the profile as outlined in the vacancy? No problem! We still encourage you to apply and take this opportunity. Who knows, on-the-job-training may be available for you for this position.

### Company Info

Wherever you go, whatever you do... Barco is closer than you think. Our technology touches everyday life: from train rides, concerts, and medical exams to sports on TV, online classes, movies, and museums. For 3,000+ colleagues worldwide, Barco is the place to collaborate on innovative solutions, learn, and grow. Our people are at the heart of our success, without them, no product, no magic, no Barco! Ready to join? Whether it's your first job, an internship, or a thesis project, get in touch and explore the possibilities!

### Job options

At the start of your own bright tomorrow? Then you've come to the right place. We're a house of innovation that wants to make a difference in people's personal and professional lives. That means yours too. By kickstarting your career as a future visioneer, for example. We have jobs in many different domain like, software, hardware, engineering, mechanics, sales, service, and even so much more.

### Selection procedures

- 1. Application**  
You start by applying for a job opening that interests you.
- 2. First Interview**  
If your profile matches what we are looking for, we will invite you for an initial interview via Teams with our HR department.
- 3. Second Interview**  
The next step is an on-site interview with the hiring manager.
- 4. Third Interview**  
Depending on the position and the hiring manager, there may be a third interview with a team member. This is an opportunity for you to get familiar with the team and the work environment.
- 5. Offer**  
If all interviews are successful, we will proceed with an offer.

### Company Info

Basalte's founding mission consists in marrying quality design with intuitive, intelligent home automation. This unique combination remains a crucial part of our DNA. We want to keep things simple and elegant, both in form and in function.

It all started with an innovative design switch but today we offer so much more: multifunctional design controls, sophisticated speakers, elegant iPad holders, an intelligent home server and even an intelligent remote control. We work closely with integrators, architects and interior designers who are active across the globe in the residential luxury market to make sure our smart home solutions can be integrated seamlessly into the most exclusive villas, apartments, hotels and yachts anywhere in the world.

### Job options

We're currently hiring for three positions at Basalte:

- 1. Software Engineer**  
Focus on Embedded Linux development and integrations with third-party systems.
- 2. Front-end Engineer**  
Responsible for our app development, ensuring a smooth and intuitive user experience.
- 3. Technical Support Engineer**  
Provides support and training to our customers, the system integrators, helping them implement and optimize our solutions.

### Selection procedures

- Our recruitment process consists of three steps:
- 1. Introductory Interview**  
You'll first have a meeting with the manager of the team you'd join, together with HR. This is an opportunity to get to know each other and discuss your experience and expectations.
  - 2. Job Tasting / Trial Afternoon**  
Next, you'll spend an afternoon at our company, working on a practical assignment. This gives you a feel for our environment and allows us to see your skills in action.
  - 3. Offer**  
If everything goes well, we'll make you a formal offer to join the team.

## Bayer Agriculture

### Contact

katrien.mertens.ext@bayer.com

### Location

Antwerpen

### Website

### Employees

Belgium

750

Worldwide

124.000

### Company Info

Bayer is a world-class innovation company with more than 150 years history in the life science fields of health care and agriculture. Bayer successfully completed the acquisition of Monsanto in June 2018, bringing together Monsanto's leadership in seeds and plant traits with Bayer's leadership in chemical and biological crop protection. By joining forces, we will create even more extensive career opportunities for talent around the world. We're a global team working to shape agriculture through breakthrough innovation that will benefit farmers, consumers, and our planet.

### Job options

- Process Engineer
- Energy Engineer
- Reliability Engineer
- Mechanical Engineer
- Operations Team Lead

### Selection procedures

Online application via [www.career.bayer.be](http://www.career.bayer.be).

The application process consists of a phone screening, a personality questionnaire and reasoning test and an interview with the recruiter and hiring manager.

Would you like to know more about what our people do and how they feel at Bayer? Check <https://www.bayer.com/be/nl/career/our-people>.

## Bayer Antwerp Site

### About Bayer

Bayer is an innovating world class enterprise with more than 150 years history and core competencies in health and agriculture.

We develop new molecules that we use in innovative products and solutions to improve the health of humans and plants. Our research and development activities are based on an in-depth knowledge of the biochemical processes in living organisms.

We act sustainably, ethically and socially responsible, taking into account the interests of all our stakeholders. Employees with a passion for innovation are given excellent development opportunities at Bayer. Our values play an important role in our daily work and are a guideline in fulfilling our mission. These values are contained in the word LIFE (Leadership, Integrity, Flexibility and Efficiency).

### Bayer Agriculture Antwerp

Bayer Antwerp has approximately 750 employees. Chemicals are produced by 5 production units. These production units belong to Bayer, Flexsys, Eastman and Henkel.

Flexsys is a global manufacturer of rubber adhesives that make rubber products including tires safer, last longer, and perform better.

Eastman is a multinational company that produces a wide range of chemicals including PVB film for the production of safety glass but also coatings, inks, specialty plastics, fibers, etc.

Henkel Adhesives is a leading global manufacturer of adhesives, synthetic polymers, electronic materials, and others.

### Supporting services and Guest operations

The supporting departments on the Antwerp site belong to Bayer, but also have a service-oriented function towards the guest operations. More specifically, it concerns the following departments: lab, logistics, maintenance and engineering, security service, human resources, accounting, utilities and IT. All (about 750 permanent) employees, working at the Bayer site in Antwerp have a Bayer status.

#### Location

Brussel - Vlaanderen - Wallonië - Internationaal

#### Company Info

BESIX is a leading international construction and engineering group, active in building, infrastructure, marine, and industrial projects. The company delivers complex and innovative solutions in Belgium and worldwide, combining technical expertise with a strong focus on safety, sustainability, and quality. BESIX operates across the entire project lifecycle, from design and engineering to construction and maintenance. With a strong people-driven culture, BESIX invests in talent development and offers employees the opportunity to work on challenging projects within a stable, international environment.

#### Job options

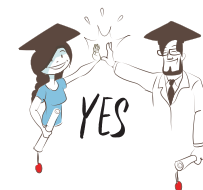

BESIX offers a wide range of job opportunities across technical, operational, and corporate functions. Core roles include engineering and project-based positions such as Site Engineers, Project Engineers, Planning Engineers, and Construction Managers. In addition, BESIX employs professionals in support functions like HR, Finance, IT, Procurement, and Communications. For students and graduates, internships, entry-level roles, and initiatives such as the BESIX Young Professional Days provide a strong start to a career within an international construction and engineering group.

#### Selection procedures

The selection process at BESIX starts with an interview with the HR team, followed by one or two interviews with the hiring manager and the relevant department. At least one interview takes place on site. In addition, BESIX organizes the BESIX Young Professional Days on March 18, March 24, and April 24. During these days, young graduates experience BESIX through workshops, presentations, and an on-site job interview. Successful candidates receive a salary proposal a few weeks later.

**Belgium**  
75

**Worldwide**  
115

### Company Info

Be-Mobile is een toonaangevend Belgisch technologiebedrijf dat slimme mobiliteitsoplossingen ontwikkelt om verkeer veiliger, vlotter en duurzamer te maken. Vanuit ons hoofdkantoor in Gent bouwen we met een enthousiast team innovatieve platformen voor connected cars, realtime verkeersinformatie, routeplanning, tolheffing en parkeeroplossingen. Onze technologie ondersteunt overheden, mobiliteitsoperators en bedrijven in heel Europa bij het efficiënter beheren van mobiliteit en het verminderen van verkeersdruk. Samen werken we aan de weg naar slimme, verbonden en toekomstgerichte mobiliteit.

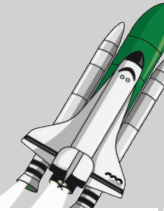

### Job options

Wij bieden een aantrekkelijk loonpakket met extralegale voordelen zoals maaltijd- en ecocheques, groeps- en hospitalisatieverzekering, smartphone met abonnement, laptop en flexibele verloningsopties. Je werkt in een moderne ontwikkelomgeving met ruimte voor technische groei, kennisdeling en ownership. We hanteren flexibele werkuren, hybride werken en een sterke focus op work-life balance. Je komt terecht in een team van gedreven developers waar codekwaliteit, innovatie en teamwork centraal staan.

### Selection procedures

Na een telefonische screening plannen we een eerste gesprek met onze CTO voor een inhoudelijke en technische kennismaking. Bij een positieve match volgt een tweede gesprek met HR en de toekomstige teamlead, waarin we verder ingaan op cultuur, samenwerking en verwachtingen.

## Bilfinger

### Company Info

Bilfinger is dé multidisciplinaire partner voor projecten en onderhoudswerkzaamheden aan industriële assets. Simpel gezegd: wij zorgen ervoor dat fabrieken en industriële installaties veilig en efficiënt blijven functioneren, door ze te bouwen, te onderhouden of aan te passen. Dit voornamelijk in de procesindustrie.

Bij Bilfinger Engineering & Consultancy helpen we industriële klanten hun duurzaamheidsambities waar te maken. Met innovatieve technieken en digitalisering bieden we concrete oplossingen voor complexe energie- en milieuvraagstukken. Al sinds 1945 zijn we een toonaangevend ingenieurs- en adviesbureau voor een toekomstbestendige industrie.

### Job options

Binnen Bilfinger zijn er tal van opties. Afhankelijk van jouw interesses bekijken we wat de mogelijkheden kunnen zijn.

Enkele voorbeelden: structureel ingenieur, projectingenieur E&I, mechanisch of binnen hoogspanning, werkvoorbereider,...

### Selection procedures

Heb je interesse?  
Dan nodigen we je graag uit voor een kennismakingsgesprek. Dit kan via teams of op een van onze kantoren.  
Daarna volgt er een gesprek met de managers om inhoudelijk de functie nog beter toe te lichten. Hierna volgt een joboffer.

## Bio-Dynamics

### Contact

## Company Info

Citymesh isn't just another telecom company.. We're shaping the future of connectivity. As a European leader in B2B telecom, we deliver innovative solutions like Mobile Private Networks, 5G connectivity and temporary solutions for events such as Tomorrowland, Rock Werchter and the Pokémon World Championships. Wherever it is needed, we ensure seamless and reliable connectivity.

We're all about making a real impact on society. From drone technology and critical communications to future proof connectivity, we're breaking barriers and supporting businesses of all sizes as well as public services. Through our B2B telecom offer and our joint venture with DIGI, we're also helping to make telecom more accessible. We work on technology that truly makes a difference.

## Job options

Ready to build the connectivity of tomorrow? At Citymesh, we pioneer 5G, private networks, and mission-critical tech. We would love to meet:

- Data & Security: Experts to safeguard critical infrastructure and manage secure data flows.
- Network Engineering: RAN, System, and Network Engineers for advanced 5G/WiFi design.
- Technical Sales: Driven profiles with a passion for connectivity to bridge the gap between tech and business.
- Field Ops: Project Managers and Technicians realizing innovation on-site.

## Selection procedures

Apply via our jobsite! We start with a video call with HR to get to know you. If there's a match, you'll be invited for an on-site interview with HR and the Department Lead. This is your moment to prove your knowledge, enthusiasm, and willingness to learn. For specific roles, you'll showcase your expertise through a case study. Most importantly: we look for a genuine fit with our team and company culture. Ready to join the Citymesh family? Let's connect!

Ready to make an impact?  
Connect with your future colleagues!

CNH

**Contact**  
tiemen.rosseel@cnhind.com

**Location**  
Zedelgem - Antwerpen

**Website**

**Employees**

Belgium	Worldwide
3.500	35.000

### Company Info

CNH Belgium, part of CNH, is a global leader in agricultural and construction machinery. Our Zedelgem site develops and produces high-performance harvesting equipment, including combines, forage harvesters and balers. With decades of expertise, we combine advanced technology, precision engineering, and sustainable practices to meet the evolving needs of farmers and contractors worldwide. Committed to innovation, we create machines that boost productivity, efficiency, and environmental responsibility. As part of a global network, CNH Belgium plays a key role in shaping the future of farming and infrastructure.

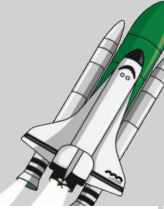

### Job options

Looking for a career that drives innovation? CNH Belgium offers exciting opportunities in engineering, manufacturing, and technology at our Antwerp and Zedelgem sites. Join a global leader in agricultural and construction equipment, where your ideas help shape sustainable solutions for the future. Explore roles in design, production, R&D, and more—grow your skills and make an impact worldwide.

### Selection procedures

Our selection process is designed to be clear and efficient. It starts with an introductory interview, either online or on-site. Next, you'll meet HR Business Partners and potential colleagues for a second conversation. If needed, a third meeting will address any remaining questions. After a successful first interview, candidates complete online assessments from home. This process ensures transparency and helps us find the best match for both sides.

### Company Info

Crunch is a data & AI agency. We help both business frontrunners and analytics leaders when applying data science, statistics, machine learning, and AI. We are based in Ghent and have another office in Rotterdam.

We have been fortunate to work with a variety of teams in Europe, such as G-star, Scotch & Soda, Vandeveld, Heineken, Beerwulf, Hornbach, Unilin, Hunkemoller, Brico, Eurocontrol and Roompot.

What sets us apart?

We have an extensive track record working on projects in Retail and FMCG but also other industries that especially combine our business acumen with expertise in data management, ML, AI, and statistics. We analyze data, predict trends, advise on forecasting and help businesses grow.

### Job options

We are looking for Data Engineers and Data Scientists to work in a vibrant, friendly atmosphere in our Ghent office.

You can always find current job vacancies on our website: <https://careers.crunchanalytics.be/>.

### Selection procedures

Our hiring process is thorough. It consists of clear steps:

1. Apply for a specific job.
2. We screen your resume.
3. Phone interview comes next.
4. Complete a job-specific challenge.
5. Present the results of your challenge.
6. Welcome on board.

## Dataroots

**Contact**  
recruitment@dataroots.io

**Location**  
Gent - Leuven

**Website**

**Employees**

**Belgium**  
180

**Worldwide**  
180

### Company Info

Dataroots is a team of passionate experts who use AI, data, and cloud technologies to help companies work smarter. As part of the global Talan Group, we combine local expertise with international reach.

We collaborate closely with clients to unlock the value of their data: improving processes, enhancing customer experiences, and ensuring compliance. Our work spans data strategy, AI, and cloud-native data platforms, always with a focus on building sustainable, long-term solutions.

Our culture is built on diversity, knowledge sharing, and a passion for technology. We believe in empowering people, both our clients and our colleagues, to grow and succeed.

If you're curious about data, eager to learn, and excited to work with cutting-edge AI, dataroots offers a supportive environment.

### Job options

We deliver end-to-end AI solutions, requiring experts at every step. Therefore, we are looking for:

- Cloud architects to build the scalable platforms AI runs on.
- Data engineers provide clean, reliable data.
- ML engineers turn this data into intelligent models.
- Analytics engineers to connect these models to real business needs, ensuring our AI solutions create clear, lasting value.

### Selection procedures

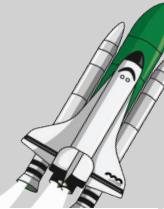

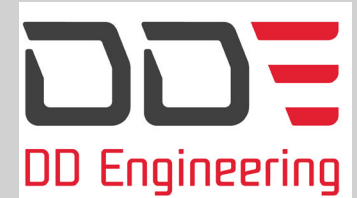

Soon after the Jobfair, we will get in touch with those that expressed interest in Dataroots. We will keep those interested updated on the opening of our junior vacancies.

Once the vacancy opens and you apply via dataroots.io, you will be subject to:

1. CV screening
2. A small assessment
3. HR interview
4. Technical interview
5. Conversation with your future manager

If you are hired, you'll get to start alongside other junior data professionals in our famous Rootsacademy in September!

## DD Engineering

**Worldwide**  
48

### Company Info

Engineering the factories of tomorrow at DD Engineering.

As architects of production lines and internal logistics, our focus is invariably on innovation, automation & digitization, safety and sustainability. To achieve this, our four different engineering specializations work closely together. At DD Engineering we have experts in every required specialization.

As a fast-growing company, we are always looking for driven and passionate employees for each business unit.

As a company we work almost exclusively with Civil or Industrial Engineers and this as much as possible on a project basis. We can intervene very early in investments, starting with strategic advice on technical installations and making a feasibility study, up to and including the implementation of the entire project.

### Job options

Young Potential - Project Engineer (Plant/Safety)  
<https://www.ddeng.be/jobs/young-potential/>

We offer a Young Potential program to train you as a multidisciplinary Project Engineer. You work with senior engineers on real projects from concept to execution and receive training in process, mechanical, automation and safety engineering. After the program you grow into a full Project Engineer with opportunities in plant and safety projects. Hands-on mindset and engineering degree required.

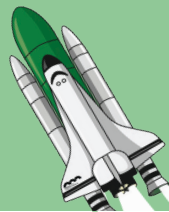

### Selection procedures

To become a Young Potential at DDE, you simply apply and we schedule a short call to get to know each other. Next, you join our case day where we explore your skills. If it's a match, you receive your contract and we start together. Let's go!

### Company Info

Help us build the bridge between business and IT.

We are an IT consultancy company. We like to bring out the best in technology (and in people!) to help our customers improve their business processes. We truly believe that innovation and technology go hand in hand, so we're always on the lookout for new, exciting tools. Either way, as consultants, we take pride in the solutions we build and the services we offer. Want to know more? Here are some fun facts & figures about us!

Let's get you off to a flying start.

Whether you're interested in software development, business processes, data analytics or digital transformation, we trust that you and your expertise will fit right in. Discover a whole new world as a technical consultant, a functional consultant, or somewhere in between.

### Job options

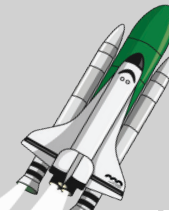

Bij delaware zijn er tal van jobmogelijkheden voor juniors die willen starten in consultancy en IT. Je kan aan de slag in domeinen zoals Supply Chain & Logistics, Finance & Performance Management, Finance & Business Controlling, Data & AI, Customer Experience & CRM, HR en Information Management. Daarnaast biedt delaware ook technische juniorrollen in ERP, .NET, web- en mobile development, low-code & RPA, integratie, cloud & infrastructuur en software testing & ALM.

### Selection procedures

Het rekruteringsproces bij delaware start met een sollicitatie via de website. Na een eerste screening word je uitgenodigd voor een gesprek met de verantwoordelijke recruiter. Daarna volgt een inhoudelijk gesprek met de teamlead om je kennis en motivatie te bespreken. Afhankelijk van de rol kan er nog een laatste gesprek met de solution lead plaatsvinden als finale check vóór een aanbod.

### Job options

At Eastman we offer meaningful growth opportunities, a competitive salary and benefits package, and collaborative global work environment.

We champion diversity and inclusion, encouraging talented individuals to work together to turn great ideas into materials that improve everyday life. In Ghent, Eastman is the largest employer in the chemical sector, operating two production sites and a research centre.

### Selection procedures

Our selection process is fair, transparent and designed to identify the best fit for both the role and our culture. Candidates can expect a straightforward application review followed by interviews and practical assessments where relevant, with timely communication at each step and equal consideration given to diversity and potential.

### Company Info

De EIFFAGE-groep is een van de grote namen in de Europese bouw- en concessiewereld. Met 66.000 medewerkers wereldwijd halen ze jaarlijks een omzet van 14 miljard euro.

In België kom je EIFFAGE tegen via Eiffage Construction BeLux, Eiffage Energie en de Groep Smulders. Samen werken hier in de Benelux zo'n 4.000 mensen, met een omzet van bijna 1 miljard euro.

Wat EIFFAGE zo interessant maakt? Ze zijn actief in vijf verschillende domeinen: van Bouw en Burgerlijke Bouwkunde, Vastgoed en Waterbouwkunde tot Energie en Metaalconstructie. Kortom, volop kansen om mee te bouwen aan indrukwekkende projecten!

### Job options

Bouw & Burgerlijke Bouwkunde

Werken aan grootschalige bouwprojecten:  
- Projectingenieur of werfleider.

Extra mogelijkheden voor studenten:

- Stages en afstudeerprojecten
- Traineeships
- Junior functies voor starters: calculatie en BIM

### Selection procedures

Wil je bij EIFFAGE aan de slag? Dit is wat je kan verwachten:

- 1) Online sollicitatie - Je uploadt je cv en motivatiebrief via onze website. Vertel ons wie je bent en waarom je bij EIFFAGE wilt werken!
- 2) Screening - Ons HR-team bekijkt je profiel en checkt of je past bij de functie en ons bedrijf.
- 3) (Video)interview - Een eerste kennismaking met HR en/of je toekomstige team. We willen jou leren kennen!
- 4) Eindgesprek - Je ontmoet je toekomstige manager of teamleider.
- 5) Welkom bij EIFFAGE! - Ben je door de selectie? Dan start jouw avontuur aan één van onze uitdagende projecten.

**Innovatie –**  
Eiffage Benelux investeert in duurzame en slimme bouwoplossingen.

**Duurzaamheid –** Sterke focus op circulair bouwen en milieuvriendelijke projecten.

**Veiligheid –** Sterke focus op werfveiligheid en welzijn van werknemers.

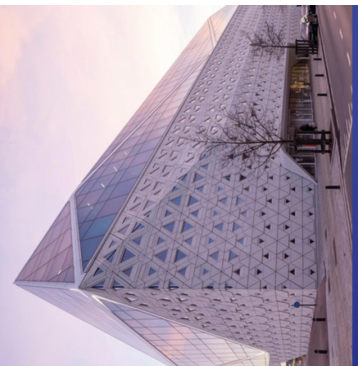

**Expertise –** Hoge kwaliteit en techniek in civiele bouw, infrastructuur en projectontwikkeling.

**Carrièremogelijkheden –** Veel kansen voor stage, opleiding en doorgroeimogelijkheden.

Wij zijn Elia, de Belgische transmissienetbeheerder die de betrouwbaarheid en duurzaamheid van de elektriciteitsbevoorrading in ons land verzekert. Studeer je binnenkort af? Ben je klaar om te shinen en te groeien naar ongekende hoogtes? Elia is the place to be! Bij Elia bouw je mee aan de toekomst van het elektriciteitsnet in België en krijg je als getalenteerde techniek, ingenieur, designer, business strateeg of data- en IT-profiel de kans om samen een impact te maken die de wereld verlicht.

3 redenen om voor een job bij Elia te kiezen:

1. Een job vol variatie in een werkomgeving waar impact en innovatie centraal staan.
2. Focus op persoonlijke groei en welzijn.
3. Een divers team van gepassioneerde collega's staat klaar om jou te verwelkomen.

**Job options**

**JUNIOR ENGINEER**

Als junior engineer bij Elia krijg je vanaf dag één verantwoordelijkheid in uitdagende projecten die mee de energietransitie vormgeven. Je wordt begeleid door ervaren collega's en bouwt stap voor stap expertise op in jouw domein – van netontwikkeling tot grote infrastructuurprojecten of digitalisering.

**CORPORATE TRAINEESHIP**

In het corporate traineeship bij Elia maak je in een rotatieprogramma kennis met verschillende afdelingen en functies binnen het bedrijf. Je werkt mee aan uiteenlopende projecten met zowel technische als business uitdagingen.

**Selection procedures**

1. Sollicitatie via jobsite: <https://jobs.elia.be/>
2. Pre-screening (online)
3. Selection Day (corporate traineeship) of HR & Business interview (junior engineer)

#### Company Info

Shape the future of energy with us.

At Elindus, you'll help build the energy landscape of tomorrow. You'll work with real data, tackle meaningful challenges, and design smart energy strategies that support thousands of entrepreneurs across Belgium.

We're a young, close-knit team where your ideas genuinely matter. Whether you're analysing market trends or developing innovative energy solutions, you'll have the freedom to grow, take ownership, and make a real impact in a sector that evolves every single day.

Ready to power your career?

Visit our website and discover our vacancies: [elindus.be/jobs](https://elindus.be/jobs)

#### Job options

##### • Junior Energy Trader:

We are looking for energetic and passionate traders who are driven to get the best out of themselves and contribute to the future of Smart at Energy. By closely monitoring the energy markets, you identify patterns, optimize purchasing strategies, and back-test the results of our models.

##### • Data Scientist:

You enjoy diving into data in all its shapes and sizes, always with a strong ear for the business needs. Through your analyses, you become a key player across all departments.

#### Selection procedures

At Elindus, our recruitment process is clear, personal and transparent. After receiving applications, HR reviews each profile and selects candidates for an initial interview focused on motivation, experience and cultural fit. Selected candidates then meet the hiring manager for a deeper discussion on the role and expectations. Depending on the position, an additional interview or assignment may follow. We conclude with a clear offer and a warm onboarding, ensuring a smooth start at Elindus.

# Bouw mee aan de energie van morgen

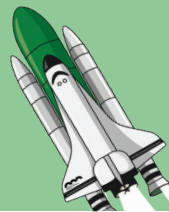

Bij **Elindus** werk je met data, marktanalyses en slimme energie-oplossingen in een sector die razendsnel evolueert. Je krijgt verantwoordelijkheid, impact en een sterk team rond je. [elindus.be/jobs](https://elindus.be/jobs)

## Establis

**Contact**  
jcrombe@establis.eu

**Location**  
Roeselare - Gent

**Website**

**Employees**

**Belgium**  
30

**Worldwide**  
30

### Company Info

Establis Group is een familiaal ingenieursbureau, met specialisatie binnen stabiliteit. Met een team van ongeveer 30 collega's, zijn we klein genoeg om persoonlijk en flexibel te blijven, maar groot genoeg om alle kennis in huis te hebben.

Establis bestaat uit 2 business units.

Evolv Engineering is gespecialiseerd in het ontwerp en de stabiliteit van vaak complexe projecten zoals ziekenhuizen, scholen, kantoren en woningen. We voeren nieuwe stabiliteitsstudies uit en verfijnen bestaande studies. Skald Engineering focust op industriële projecten, zoals automatische stapelmagazijnen, diepvrieshallen en productiegebouwen. Skald is sterk in het bieden van oplossingen op bouwtechnische vragen, van structuur tot afwerking, voor nieuwbouw- en renovatieprojecten.

### Job options

- Master Bouwkunde of Architectuur
- Interesse in stabiliteit & interesse in een job als Stabiliteitsingenieur, BIM-Ontwerper of Projectleider
- Gemotiveerd, oplossingsgericht & met oog voor detail
- Op zoek naar sterke begeleiding als starter & doorgroeimogelijkheden

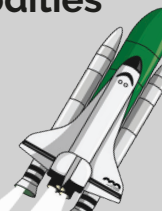

### Selection procedures

Bij Establis krijg je ruimte om te groeien. Je wordt als starter zeer goed begeleid, leert van ervaren collega's, werkt mee aan uitdagende projecten en ontdekt waar jouw talent het beste tot zijn recht komt. We geloven in open communicatie, teamwork en een gezonde balans tussen werk en plezier.

Of je nu graag rekent, tekent of overlegt met architecten en aannemers, bij Establis Group vind je een plek waar jouw kennis echt impact heeft.

Je kan ons contacteren voor een vrijblijvend gesprek via [jobs@establis.eu](mailto:jobs@establis.eu) en je kan al onze vacatures terugvinden via <https://www.establis.eu/nl/jobs>.

## European Commodities

**Worldwide**  
10

### Company Info

European Commodities is a dynamic short-term power trading company where speed, analysis, and teamwork come together. We operate in a market that never stands still — and neither do our people.

At European Commodities, trading is not just about numbers and markets, but about energy, growth, and enjoyment. Every day, we build expertise, trust, and performance together as a team.

### Job options

We are looking for young, passionate talent with drive and ambition. People who:

- Are hungry to grow
- Are curious and dare to ask questions
- Take responsibility and show an entrepreneurial mindset
- Understand and strengthen teamwork
- And above all: want to have fun in what they do

Experience matters, but mindset is decisive.

People at European Commodities think and act with:

- Excitement & enthusiasm
- A learning mindset
- A mastery mindset: striving for excellence, discipline, and control

We are currently seeking traders, quantitative algorithm developers, and data scientists.

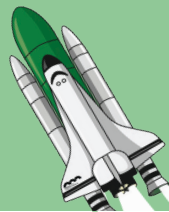

### Selection procedures

Interview with the Head of Trading and Management, including an analytical test.

ExxonMobil is the largest oil company in the world. It is active in more than 200 countries. We achieved this by combining the first-class talents of our employees with first-class results in all areas we operate in. We believe in our people and are constantly looking for new talent. This is why we offer our employees every opportunity to develop their abilities. Everyone who starts working at ExxonMobil is offered a real career, not only a job. Training, regular job rotation and flexibility are key concepts for a successful career at our company.

#### Job options

Hiring 1-5 engineers

- Internship Engineer - Belgium
- Graduate Engineer - Belgium

#### Selection procedures

Interested to join us? Apply via our career website (<http://careers.exxonmobil.com>) and search for "Engineer Belgium". Once selected, you will be invited for an interview at one of our sites (Antwerp, Zwijndrecht or Meerhout). If successful, you will receive a confirmation of your selection and get an offer. Hope to welcome you soon!

Be part of our energy

Location: Antwerp, Zwijndrecht, Meerhout

## Graduate Engineer - Belgium

We are looking for talented engineers!

In the Antwerp Area we are offering job opportunities for Process Engineers. In this role you ensure the operation of a manufacturing unit and strive for optimal efficiency, cost effectiveness and operational safety. A next step may be the technical ownership of another process unit, a "coordinating" position such as checking and managing energy consumption in the entire manufacturing site or a commercial/business role.

#### You have / are:

- 5 year university education MSc Engineering Science (Chemical, Materials, Mechanical, Electrical, Energy, Applied Physics) and Bioscience Engineering (Chemistry & Bioprocess Technology, Catalytic Technology).
- fluent in Dutch and English
- strong analytical, problem solving and communication skills
- well organized and able to manage multiple tasks
- proactive, with an ability to anticipate, identify and resolve potential issues
- effective leadership skills, including influencing with no direct formal authority
- strong interpersonal skills and ability to collaborate with people from various backgrounds in developing innovative solutions
- broad career interests and international mindset

#### This awaits you ...

We offer a wide range of benefits including competitive pay, team mates who support and inspire you, the flexibility to explore multiple challenges and roles. Your development never stops. A variety of job roles and access to cutting-edge training let you expand your potential throughout an entire career. At ExxonMobil we have your back. We want you to enjoy a career with us. That's why we provide the safest workplace we can, so you can work with focus and peace of mind.

Interested to join us? Then apply now.

We are looking forward to connecting with you !

Apply online via our website [jobs.exxonmobil.com](https://jobs.exxonmobil.com)

#### Curious about this opportunity?

Stay connected with us and apply

Hope to welcome you soon!

#### Company Info

As the chip lab of the world, imec drives the advancements that power today's most cutting-edge technology. By making chips smaller, faster, more affordable, and more sustainable, we tackle the most pressing global challenges, such as climate change, pollution, accessible healthcare, and sustainable food provision. Imec is shaping the future.

imec.istart is imec's open accelerator program helping tech startups grow globally. We offer pre-seed funding, tailored coaching, and access to imec's network and expertise.

We connect ambitious talent with high-potential startups and scale-ups. Whether you're a student, intern, junior, senior, or exploring co-founder opportunities, there could be a match for you.

#### Job options

We're not exaggerating when we say the world's best infrastructure can be found in our clean-rooms. And your work makes a difference. At imec, your novel ideas from academic research are brought towards higher technology readiness levels, making them suitable for industry. High impact guaranteed. Take the opportunity to work in a one-of-a-kind environment with unique expertise and the most advanced technology. We are looking for:

- Researchers
- R&D assistants
- Software Developers
- R&D engineers
- Performance Computing Architects
- Data Scientists

#### Selection procedures

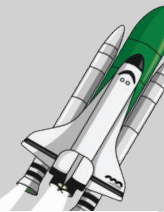

How we hire our talent:

If there's a match, we'll have a first interview. If you live abroad we will do a first phone interview. In this interview HR will check on your overall motivation and fit with imec. The hiring manager will assess your technical knowledge and background. To prepare for an in-depth interview you will be asked to fill in a personality questionnaire. Our goal is to get to know you better and we hope you will do the same.

Make sure you are prepared:

research imec, our business, our technology and services. Just relax and be yourself.

We're just as eager to meet you.

Our long-term ambition is to build a worldwide network of engineering offices to support our clients globally. We are looking for entrepreneurial individuals eager to contribute to the factories of the future. At Group-IPS, you grow faster by taking responsibility, working on impactful projects and driving initiatives in a dynamic, agile and international environment.

### Job options

We offer opportunities for engineers to work on multidisciplinary and international projects across different industries.

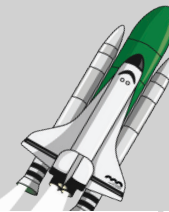

- Engineering Intern
- Graduate /Junior Engineers
- Junior Project Engineer
- Safety Engineers
- Construction coordinators
- Civil Engineer

### Selection procedures

As part of our recruitment process, we invite all candidates to participate in our Job Day, a dedicated day where you will have the opportunity to interact with our managers and experience our company firsthand. Ask our team about more information!

In addition, candidates are required to apply through our website, both to attend the Job Day and to formally participate in the selection process, which consists of several interview stages.

### Company Info

Ready to kick-start your career in IT and utilities?

Itineris was founded from scratch by our CEO, Edgard Vermeersch, who combined vision, persistence, and entrepreneurial spirit to grow the company into a trusted partner for utilities - successfully expanding into the U.S. and European markets along the way. That same entrepreneurial mindset continues to drive us today.

Why intern at Itineris?

- Work on real, cutting-edge projects alongside experienced industry leaders
- Gain valuable, hands-on experience in IT and utilities
- Be part of a supportive, innovative, and international team
- Get a head start on your career even before you graduate

Let's shape the future of the utility industry together!

### Job options

There are many options within IT:

As an analyst, you act as the bridge between business and IT. Together with your team, you work closely with clients, often in an international context, to help build our tailored solutions.

Not excited about international travel? No problem. Our R&D department offers great opportunities as well.

More IT-driven and eager to dive deeper into development? That's absolutely possible!

Interested in Data & AI? Then you're in exactly the right place with us too!

### Selection procedures

When you're interested, we want to give you a clear picture of what you can expect with us. That's why we'd love to get to know you: both through a conversation with our HR team and with the potential manager you might be joining. So you have a clear view about our projects, your tasks and what team you'll be working on.

# WE ARE WORLD BUILDERS

Jan De Nul shapes water, land and energy around the world. We seek solutions to some of the greatest challenges of our time. From rising sea levels to the energy transition, from contaminated soil to sustainable living: we build solutions, known for their complexity and high stakes, that prepare our world for what is to come.

We focus on four core activities: Offshore Energy, Dredging Solutions, Construction Projects and Planet Redevelopment. Our talented teams work together towards a common goal: ensuring global quality of life for future generations.

## Meet Gilles, design engineer

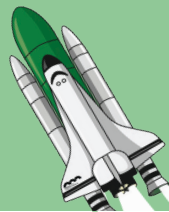

“Our team contributes to projects all over the world - quay walls, bridges, locks... you name it. Seeing our calculations come to life - that is what I love about my job.”

I work on a wide range of projects. Each project is technically very challenging, requiring you to think outside the box. You are in a working environment where initiative and creative thinking are really encouraged.

## Logflow

**Contact**  
floris.vandenbussche@logflow.be

**Location**  
Oostkamp - Zandhoven

### Website

### Employees

Belgium	Worldwide
50	50

### Company Info

At Logflow, we are once again looking for a few high potentials to join our team. Logflow helps companies across all sectors develop a long-term vision to guide them towards becoming "Factories of the Future." We are looking for strong engineers to bring together Supply Chain, Automation, Digitalization, Intralogistics, and Industry 4.0 into state-of-the-art and sustainable concepts.

### Job options

Logistics Analyst – turn data into smart logistics concepts

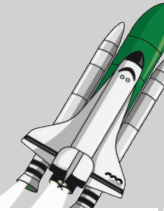

As a Logistics Analyst, you support consultants and project managers in shaping efficient logistics solutions. You critically assess client data, perform PQ analyses, visualize insights, and design warehouse layouts and material flows. You calculate operational costs, support tender documents, and help improve internal tools. We offer real impact, strong learning opportunities, and a clear growth path toward consultant or project manager roles.

### Selection procedures

Our selection process is straightforward and focused on getting to know you and your potential.

After an initial screening of your application, selected candidates are invited for an interview to discuss motivation, skills and fit with our team. This is followed by a short case/analytical exercise to better understand your way of thinking and problem-solving approach. The process concludes with a final interview and feedback.

## Luminus

**Contact**  
Jobs@Luminus.be

**Location**  
Brussel - Gent - Seraing - Hasselt

**Website**

**Employees**

Belgium	Worldwide
3.000	3.000

### Company Info

Luminus is a leading player in Belgium's energy transition, active in electricity generation, energy supply, and energy solutions and flexibility. As Belgium's No. 1 in onshore wind and hydropower, Luminus operates diversified and flexible production units that support security of supply and grid balance.

The company supplies electricity and gas to residential and business customers, holding a market share of around 24%, and offers solutions to help customers electrify and reduce CO<sub>2</sub> emissions and energy consumption. By investing in storage and flexibility, Luminus turns renewable energy challenges into opportunities.

Driven by 3,000 employees, strong local roots and the expertise of the EDF Group, Luminus works toward a CO<sub>2</sub>-neutral, electric future.

### Job options

Be part of the new energy era

Generation Zero is our inspiring Young Talent programme, a paid traineeship lasting 1.5 to 2 years. You choose three projects where you can make a meaningful impact while building your skills and expertise. Together, we work toward a bold goal: zero emissions, zero waste, zero carbon footprint.

- Young Graduates Track	- Young Tech Track
Are you a true all-rounder eager to explore diverse domains?	Do you prefer hands-on technical impact?
- Young IT Track	
Do you want to put your IT talent to work for the climate?	

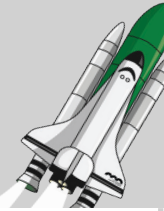

Become one of our new starters in September 2026.

### Selection procedures

First we screen your CV and you introduce yourself. Then we conduct a personality and/or reasoning test and invite you for an interview. If you score well in all rounds, you have a chance to win a ticket to Zero Camp.

Zero Camp will take place at the end of March – a day full of sustainable challenges, inspiring encounters with other Young Talents and Luminus employees, at a unique location.

# Melexis

Melexis

## Contact

jobs\_belgium@melexis.com

## Location

Tessenderlo-Ham - Ieper

## Website

## Employees

Belgium  
470

Worldwide  
2.000

## Company Info

Melexis is a global supplier of micro-electronic semiconductor solutions (mainly for the automotive industry) and stands for engineering that enables the best imaginable future - a future which is safe, clean and comfortable. All of these aspects are reflected in the applications that our technology empowers.

Melexis has a team of experienced, well-played together engineers and technicians. Thanks to their expertise in product definition, design and testing of integrated analog-digital semiconductor solutions and sensor chips Melexis acquired a leadership position.

We're now an industry leader, and as such, are always looking to expand teams with the right people.

## Job options

### WHAT'S YOUR EXPERTISE?

Engineering from A to Z. From listening to the customers and identifying their needs, to designing, testing and improving integrated circuits, machines and processes. All under the same roof.

- Development engineers: Listen to the customer and design chips that make a real difference.
- Test Solution Development Engineers: Identify, design and implement the best way to test our integrated circuits.
- Quality engineers: Maintain and improve the quality of our products, ensuring a safe ride.
- Application engineers: Ensure every chip works well in the applications.

## Selection procedures

Found a vacancy that made you smile? Or test your luck spontaneously? Apply and send your CV.

If things look promising, we'll set up a call with you. To listen and get to know each other better.

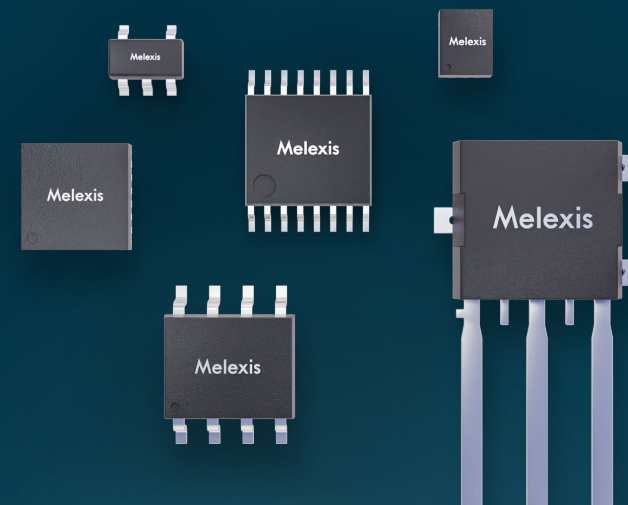

Still looking good after the call? Then you might get invited for an in-person competence interview.

Still going strong? Time to meet the hiring manager and test your skills for more technical jobs.

Time for you and us to make a decision that could lead to an offer and contract.

# Melexis

INNOVATION WITH HEART

Melexis develops advanced microelectronic sensor and driver solutions with a heart for people and the planet. Our innovative technology turns ideas into applications for the automotive, alternative mobility, robotics, digital health and sustainable systems industries.

### Company Info

Marelec Food Technologies is a high-tech innovation company developing advanced portioning, weighing and grading solutions for the global food processing industry. Based in Nieuwpoort, Belgium, and with over 40 years of engineering expertise, Marelec combines smart software, precision mechanics and data-driven technology to build machines used worldwide. As part of the international Duravant Group, we offer young technical talents the chance to work on real-world engineering challenges in a modern, collaborative and international environment. At Marelec, you grow through hands-on experience, continuous learning and close teamwork — making a real impact with technology that matters.

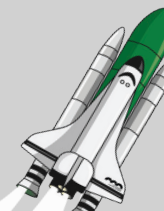

### Job options

Marelec offers exciting job opportunities for engineering students who want hands-on experience in a high-tech industrial environment. You can work on engineering challenges in areas such as mechanical design, automation, software, international service, testing and R&D. You'll collaborate with experienced engineers, apply your technical knowledge in practice and develop valuable skills.

### Selection procedures

Let's start by getting to know each other to understand your interests and expectations so we can look for the perfect match. After this initial interview, a second meeting will follow, and afterward you will receive a salary proposal.

### Company Info

MULTI enables customers to be successful by offering flexible solutions to their engineering issues. Our clients conduct capital-intensive projects in 3 markets: Industry, Building & Infrastructure and Maritime & Offshore. MULTI offers service, expertise and capacity within 3 services: at our own Design & Engineering Offices, through project sourcing, through consultancy.

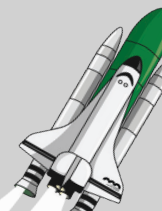

### Job options

We will sit down with you to discuss your ambitions and areas for growth. As a family-oriented organization, we find a match between the candidate's personality and our organization to be important. We offer opportunities at our offices in Temse, Gent, Vlissingen (NL) and Zwijndrecht (NL) but as well at the location of our clients via projectsourcing.

### Selection procedures

1. CV Screening: First, we review your CV to see if your skills and experience align with our needs. If positive, this is combined with a interview over the phone.
  2. Initial Meet-Up: Next, you'll be invited for a conversation to explore mutual expectations.
  3. Second In-Depth Interview & Personality Test: If all goes well, a more in-depth interview combined with a personality test follows to get to know you better.
- Salary Proposal: Upon a positive outcome, you'll receive a competitive salary offer.

## nanoGrid

### Contact

wouter.storme@nanogrid.com

### Location

Erembodegem

### Website

### Employees

Belgium

32

Worldwide

32

### Company Info

nanoGrid is a Belgian technology company building a full-stack platform for utility data monitoring and energy management. We design both hardware and software in-house to capture accurate, real-time data from electricity, gas, water and heat meters even sealed or legacy ones.

Our platform is used by large, multi-site organisations across Europe such as WDP, Goodman, Action, Shurgard and Belfius to reduce energy waste, costs while improving building performance and simplifying ESG and CSRD reporting.

Founded in 2012, nanoGrid works at the intersection of IoT, data engineering and sustainability, with real-world impact at scale.

### Job options

nanoGrid offers engineering roles that combine hands-on technical work with project coordination.

You'll support and execute real installations, work with electrical systems and IoT hardware, and help prepare, document and follow up technical projects across multiple sites. Over time, you'll take more ownership: coordinating installations, supporting field teams, and ensuring projects are delivered correctly and on time.

The focus is on learning by doing, understanding systems end-to-end, and building practical engineering experience in real buildings.

### Selection procedures

Our selection process is straightforward and technical. After an initial conversation, candidates usually complete a technical discussion or small case related to the role.

We focus on problem-solving, curiosity and practical thinking rather than trick questions.

You'll always speak with people from the team you'd be working with.

Sollicitaties via deze weg worden tevens het snelst behandeld.

## OMP

**Contact**  
snuydens@omp.com

**Location**  
Wommelgem - Gent - Waver - Parijs - Rotterdam

**Website**

**Employees**  
**Belgium** 734  
**Worldwide** 1.284

### Company Info

We are OMP, a leading game changer in supply chain planning solutions.

The world's largest companies, including Johnson & Johnson, Procter & Gamble, and Nestlé, count on our smart software and services to optimize their supply chains.

Our commitment to people and innovation is our key driver of success. That's why we continuously invest in growing talent and industry expertise.

Are you ready to join over 1,200 passionate colleagues of over 65 nationalities?

### Job options

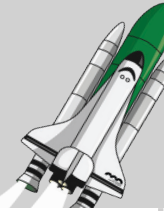

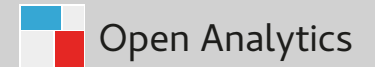

- Consultants: You equip customers with supply chain planning solutions. You analyze planning challenges, assist in the solution design, implement and validate the solution, and ensure a smooth go-live. Customers rely on your support throughout the entire project life cycle.

- Software Engineer: You contribute to the creation of innovative and leading software solutions. Guided by our top-notch software architects and software experts, you participate in all the steps of the software development life cycle from analysis, architectural design, and programming to maintenance.

### Selection procedures

After an online assessment and a first interview with a recruiter, we will invite you to the office for a half day of interviews (the "Career Day"). We will let you know that same day if we will extend an offer!

## Open Analytics

**Contact**  
careers@openanalytics.eu

**Location**  
Antwerpen

**Website**

**Employees**  
**Belgium** 60  
**Worldwide** 60

### Company Info

Open Analytics is a consulting company specialized in supporting the data analysis process of its customers end to end. We provide services and products to support this process using open technology.

The teams at Open Analytics are composed of highly-trained and talented experts in mathematics, statistics, engineering and computer science. By focusing on our analytical expertise and supported by a time-tested consulting methodology we are able to solve problems in a very broad range of applied domains and across industrial sectors.

Our offices and data center are based in Antwerp, but we provide our services across industries and geographies. Long-standing relationships with clients around the world speak to the quality of our work and our ability to respond to clients' changing needs.

### Job options

- Software Engineer for a MSc in Computer Science
- Data Scientist for a MSc / PhD in Computer Science, Engineering or Statistics
- Statistician for a MSc / PhD in Statistics, Mathematics or Engineering
- Infrastructure Engineer for a MSc in Computer Science

### Selection procedures

Straightforward and simple: an e-mail with your resume and a motivation letter, an interview, followed by, for the successful applicants, an offer.

## Pattyn

**Contact**  
sophie.bajart@pattyn.com

**Location**  
Brugge

**Website**

**Employees**  
**Belgium** 255  
**Worldwide** 600

### Company Info

Pattyn, based in Bruges, is the headquarters of the Pattyn Group and market leader in bag-in-box packaging machines. With a strong focus on innovation and quality, we develop and manufacture everything in-house, giving us complete control over the process. Our team of 250 employees in Belgium and 600 employees in international branches in seven countries offers customers worldwide complete, tailor-made solutions.

As part of the Duravant Group, we benefit from a powerful international network, strategic investments, and technological innovations. This allows us to continue to expand our expertise and deliver leading packaging technology.

### Job options

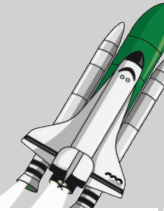

Are you passionate about machines and technology? Do you want to work in an ambitious and fun team? Are you looking for a job in a stable company with big ambitions and a people-focused environment? Then one of the positions below is probably a great fit for you.

- Mechanical Design Engineer
- Project Manager
- Finetuner
- International Field Service Engineer
- Automation Engineer
- Sales Engineer

### Selection procedures

The application process starts when you submit your details, motivation, and CV, after which you receive feedback within two working days. A first interview with a recruiter follows, usually within a week. If successful, a second meeting with your future manager explores your skills and includes a company tour, possibly with tests. Finally, you receive a contract offer to review before signing.

## Psicontrol

**Contact**  
jobs@psicontrol.com

**Location**  
leper

**Website**

## Polysense

**Contact**  
jarne.bogaert@polysense.ai

**Location**  
Gent

**Website**

**Employees**

**Belgium**  
30

**Worldwide**  
30

### Company Info

Hi there! Welcome to Polysense.

We're one of Ghents fastest-growing scale-ups fully focused on making sure the food industry produces less waste. Where manual work and static process parameters is causing tons of inefficiencies, we are using cameras and other visual sensors, computer vision, optimisation algorithms, and a lot more computer science wizardry to ensure quicker and more accurate quality inspections. To go even further, we use that quality information to optimize the process parameters.

Whether it's adjusting the oven temperature based on the browning of an eclair, or detecting how many defects we see on French fries, we are turning the food industry upside down and inside out. Not only in Belgium, but we're working across the globe. Ready to join the foodtech rocketship?

### Job options

Each year, we open up several young graduate positions. They're one of the driving forces behind our growth. At Polysense, you'll have the chance to make true impact in one of these positions:

- Summer Internship
- Master thesis
- Integrations Engineer (Full-time)

This changes quickly, so be sure to keep an eye on [careers.polysense.ai](https://careers.polysense.ai) to get the latest!

### Selection procedures

We'll guide you through the following process to see if you're a fit with our team:

- Screening call: We want to introduce Polysense and the role possibilities while checking you background, interests and possible past experiences.
- On-site interview: We're diving deeper into the culture fit to see if you align with our values.
- Technical assessment: We want you to show off your skills to part of our Engineering team.
- Final interview: Our squad leads or CTO will make the final call.

## Procter & Gamble

### Contact

fauconnier.s@pg.com

### Location

Mechelen - Strombeek-Bever

### Website

### Employees

Belgium

1.300

Worldwide

127.000

### Company Info

You probably use Procter & Gamble products without even knowing it. A staggering 3 billion people across the globe use them too, every day of the week. Because we're the name behind some of the world's most trusted, quality brands, from Dreft, Gillette, Braun and Ariel to Pampers. But you can do more than use our products: you could be creating, manufacturing, distributing, promoting or selling them. P&G has 127.000 employees, representing over 100 nationalities, about a quarter working in 17 Western European countries. So we can offer a huge array of careers in a flexible, inspiring and healthy environment. Right from the start, you'll be making your mark, owning projects that touch the lives of consumers around the world and facing new challenges every day.

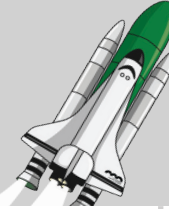

### Job options

- Engineering: Lead the startup of production factories, build custom machinery, maintain sophisticated equipment, etc.
- Manufacturing: Manage production lines, make innovative products using tools like robots, work in a cross-functional team, operate within highly technical and innovative manufacturing processes, etc.
- Supply chain: Forecast customer demand, execute production plans, ensure information is shared and accessible throughout the entire supply chain, manage the physical flow of products, etc.
- Sales: Be the link between leading brands and consumers

### Selection procedures

- Step 1: Submit your application online
- Step 2: Take on or more of our online assessments
- Step 3: Go through the P&G interviews for us to get to know you better and give you a chance to ask us questions
- Step 4: Job offer

## Proximus

### Contact

employer.branding@proximus.com

### Location

Brussel

### Website

### Employees

Belgium

12.000

Worldwide

12.000

### Company Info

Proximus is our major brand, which we are building into the reference brand that "empowers everybody to thrive in a digital world, so we can improve our shared well-being". Our brand promise "Think possible" captures that mission. We are convinced that new digital solutions make our lives easier, allow us to work together in smarter ways and make our world a better place. That is why we are always looking for the best partnerships and why we continue to invest in sustainable technology.

### Job options

- You hold a master's degree (graduating in 2026) with a specialisation in business, strategy, IT, engineering, finance, etc. We welcome candidates from diverse educational backgrounds: we believe in promoting a multidisciplinary and inclusive environment.
- You have a genuine interest in our activities and a passion for innovation and technology.
- You are fluent in Dutch or French and have a perfect command of English, enabling you to communicate effectively in a multicultural environment.
- You are eager to learn and fully commit to the programme.

### Selection procedures

We are 100% Belgian. So we make our decisions in three languages. And all at the same time if you want! We encourage personal development. At the Proximus Academy, you won't want to miss a single session.

We are committed to sustainable development.

We firmly believe that it's important to work together, but even more important to have fun together. That's why we regularly organise fun activities. (Feel free to let us know if you have a talent for playing Father Christmas!)

And what about work-life balance, which is always very important? We maintain it at an appropriate level.

## Qargo

**Contact**  
vienna.kuchta@qargo.com

**Location**  
Gent

**Website**

**Employees**

**Belgium**  
90

**Worldwide**  
150

### Company Info

Qargo is a fast-growing SaaS scale-up with offices in London, Ghent and Chicago. We build an intelligent Transport Management Platform that helps modern logistics companies run more efficiently, sustainably and profitably.

Our all-in-one system covers the full workflow, from order entry and planning to invoicing, and connects with hundreds of external tools. At the core is Qargo Intelligence, our transport-savvy AI that learns from real workflows to automate manual tasks.

As an engineer, you'll work with modern technologies, solve complex optimisation problems and help us scale a platform used across Europe and the US. You'll join a collaborative, product-driven team where your ideas matter and where you can have a real impact from day one. Join us and shape the future of logistics!

### Job options

Qargo is scaling fast and expanding multiple engineering teams. We're looking for talented people who want to build impactful products in a modern, cloud-native environment.

- Our open roles include:
- Integrations Engineer
- Frontend Engineer
- AI Engineer
- Software Engineer
- Analytics Engineer

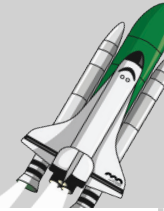

### Selection procedures

Our selection process has two steps:

**Cultural Interview:** You'll meet two Qargo engineers to discuss who you are, what you're looking for, and to ask any questions you have about working with us.

**Technical Interview:** You'll create a high-level solution design so we can understand your engineering mindset, problem-solving approach, and how you structure complex challenges.

## Quantum

**Contact**  
len.buckens@quantum.com

**Location**  
Gent

**Website**

**Employees**

**Belgium**  
15

**Worldwide**  
450

### Company Info

Quantum is an industry pioneer with over 40 years of groundbreaking expertise that provides state-of-the-art storage solutions that ensure data is available, discoverable, and safe. With Quantum, leading companies can drive new opportunities, explore new paths, or accelerate the next groundbreaking discovery. <https://www.quantum.com>

Quantum presents captivating career opportunities. Become a part of our vibrant team dedicated to revolutionizing Exabyte-scale Object Storage systems. Engage with ActiveScale's Cold Storage innovation at <https://www.quantum.com/en/products/object-storage/>

Join us at Quantum and delve into the challenges of shaping high-performance multi-tier storage systems, bringing cloud-level scale and manageability within reach of organisations.

### Job options

We are on the lookout for engineers to tackle the challenges we face with storing hundreds of billions of data objects at exabyte capacities in geo-dispersed environments for decades – without losing a single bit. You are not intimidated by distributed consensus and optimization algorithms? That's our data path team. Like service orchestration, during installs and upgrades for extra credit? Our management path team does it before breakfast. You love supporting development teams and infrastructure-as-code sounds like poetry? Join our infrastructure / devops or QA team!

### Selection procedures

After reviewing your resume, selected talent will be invited to meet with our hiring manager, followed by a technical interview. Those who successfully complete the technical interview will be invited for a final discussion with our HR team.

## Redwire Space

**Contact**  
tessa.parmentier@redwirespace.eu

**Location**  
Kruikebe

**Website**

**Employees**

**Belgium**  
150

**Worldwide**  
150

### Company Info

Formerly QinetiQ Space nv, the Redwire Space nv facility in Kruikebe, Belgium, delivers entire satellites and major satellite equipment, including on-board computers, power control and distribution units, and remote terminal units. With two cleanroom areas and multiple working labs, this facility is a major contributor to the infrastructure of the International Space Station – building sophisticated science instruments and life support systems to enable long-term crewed missions. Redwire Space nv is also developing IBDM, the International Berthing and Docking Mechanism.

### Job options

Open positions in various areas:

- Electronics Systems Engineer
- FPGA Design Engineer
- Product Assurance Manager
- Mechanical Design Engineer
- etc. ...

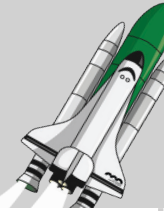

### Selection procedures

Interested in joining the Redwire team?

## RP One

**RP One**

**Contact**  
MNE@rp-one.eu

**Location**  
Vlaanderen

**Website**

**Employees**

**Belgium**  
20

**Worldwide**  
20

### Company Info

Are you a recent graduate or looking for a new step in your career? RP One is an IT consultancy specialized in Software Development and Data & AI. From our base in Vilvoorde, we work on projects across Flanders with startups and larger companies.

At RP One, we focus on you. We listen to your experience, skills, and ambitions and help you grow through a personal approach and long-term partnerships. We invest in our consultants with continuous training, a personal training budget, and guidance from a Talent Manager and Business Manager. Through events and knowledge sharing, we build strong connections. At RP One, you grow both professionally and personally.

### Job options

Junior Software Engineer

You will participate in, support, or lead project teams and help turn projects into technical success by delivering high-quality solutions for our clients. Based on your career goals, interests, and expertise, you can work on projects from the blueprint or audit phase through implementation.

You hold a Master's degree in IT or a related field and have a strong passion for Python development. You are eager to work with frameworks such as PyTorch, Django, Keras, and tools like Scikit-learn, NumPy, or TensorFlow. You enjoy variety, value clean code and best practices.

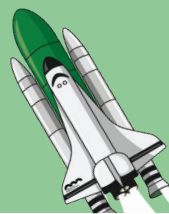

### Selection procedures

We believe in a clear and efficient hiring process. Following a positive screening of your CV, we will invite you for an online introductory interview to discuss your motivation and ambitions. The next step is an on-site interview, combined with a technical assessment to gain a clear understanding of your expertise. If there is a mutual match, a conversation with our CEO follows. Once we are aligned, we will immediately look for the best fit, whether it's for an existing project or a new opportunity within our extensive client network.

Renotec

#### Contact

## Selection procedures

We have received your application. What next? We go through your CV and cover letter. Do we see a match? Then a recruiter will call you to further discuss your application.

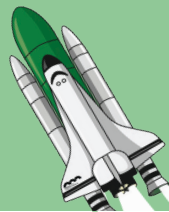

The first interview: we will discuss your competences and previous work experience. We will talk about your career plan, availability and flexibility, and align expectations.

Do we both have a positive feeling? Then we would like to invite you for a second interview. We will go deeper into the context of your future projects. Based on your profile, we may also ask you to take an online assessment, technical test.

### Company Info

Square Group verenigt als multidisciplinair bouwbedrijf verschillende ondernemingen gegroeid uit Aclagro. We ondernemen duurzaam, met sterke synergie tussen onze activiteiten. Zo realiseren we samen de meest complexe projecten. Meer dan 500 ervaren medewerkers staan elke dag klaar.

Aclagro is een betrouwbare aannemer met focus op infrastructuurwerken, bodemsanering en waterzuivering, afbraak, asbestverwijdering en grondreiniging, voor publieke en private klanten.

AC Materials maximaliseert recyclagestromen via strategisch gelegen sites in Vlaanderen.

Oryx Projects ontwikkelt uitdagende, strategische sites in stedelijke omgevingen.

DD Shipping verzorgt op- en overslag en is een logistieke troef voor de groep.

### Job options

Wervingsoproep voor 5-10 ingenieurs

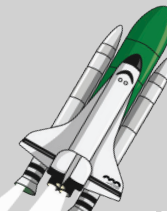

Onze zoektocht geldt voor alle verschillende divisies en afdelingen binnen de Square Group. Alcagro is een A-class contractor. We zoeken versterking voor de interne (werkvoorbereiding, calculatie, enz.) en externe (diverse werven, site management, enz.) afdelingen.

In de recyclage zoeken we ook naar een aantal auteurs die willen bijdragen aan duurzaamheid, onderzoek en circulaire ondernemerschap.

### Selection procedures

Vanuit de eerste kennismaking streven we ernaar de kandidaat te begeleiden naar de juiste functie binnen het bedrijf. Door middel van interviews, een bezoek en een gedetailleerd onboardingprogramma ontvangt de kandidaat de nodige begeleiding en ondersteuning, al van bij de start.

436

### Company Info

Studibo verenigt gespecialiseerde ingenieurs- en adviesbureaus met één gemeenschappelijk doel: duurzame gebouwen en een gezonde leefomgeving. Verspreid over Vlaanderen, Wallonië, Brussel, Nederland en Luxemburg werken meer dan 400 experts samen om projecten sneller, consistent en kwalitatiever te realiseren. Door expertise te bundelen over disciplines en regio's heen, realiseren we projecten sneller, en met meer kwaliteit. Zo combineren we de nabijheid van persoonlijk contact met de efficiëntie en slagkracht van één sterke groep, zonder het menselijke aspect te verliezen dat onze sector uniek maakt. Onze kracht ligt in samenwerking: kennisdeling tussen teams, efficiëntie in uitvoering en één gedeelde focus op de klant.

### Job options

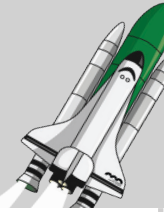

- Ingenieur Technieken
- Ingenieur Stabiliteit
- Ingenieur Akoestiek
- Safety Consultant Engineering
- Other

### Selection procedures

Bij Studibo willen we het sollicitatieproces zo transparant en eenvoudig mogelijk maken. Volg deze stappen om deel uit te maken van ons team. Zo werkt het:

- Je start eenvoudig: solliciteer via onze website of solliciteer spontaan. Daarna leren we je kennen in een kort gesprek met onze recruiter. Is er een klik?
- Dan volgt een gesprek bij het label waar jouw talent het verschil kan maken.
- Na dit gesprek hoor je snel van ons.
- Match gevonden? Dan zorgen we voor een vlotte onboarding en een warm welkom.

## Superlinear

### Contact

marketing@superlinear.eu

### Location

Brussel

### Website

### Employees

Belgium

51

Worldwide

51

### Company Info

At Superlinear, we are building Holon, the AI Operating System for Enterprise Orchestration, designed to coordinate people, processes, and machines across complex organizations and unlock up to 30% productivity gains.

We help European enterprises operate as one coordinated system, breaking down silos and improving how decisions are made and executed at scale. Our ambition is bold: to increase EU GDP by 1% by structurally improving enterprise productivity.

We're building a team around a shared mission: helping organizations operate smarter and faster through enterprise orchestration. If you want to build technology that changes how enterprises work, and see your impact reflected directly in client outcomes, Superlinear is where you belong.

### Job options

- Software Engineer - Optimization
- Forward Deployed Engineer

### Selection procedures

Our selection process looks like this:

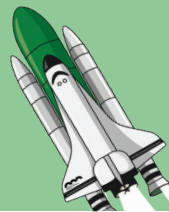

1. A first intro call with the hiring lead (about 30 min)
2. A conversation with your potential future manager
3. A task or challenge to give you a feel for the role
4. A final debrief and decision

The Talent team will walk you through the process for your role during your initial chat and provide all the information and resources you need to succeed. Each interview is a two-way conversation, so you'll have plenty of time to ask questions. We typically complete the process within three weeks of your application.

### Company Info

Verhaert and Verhaert Consulting are part of the Verhaert Masters in Innovation group, that support companies in their development and innovation processes.

Verhaert Consulting is the key player for all project sourcing activities to companies to strengthen their R&D, product development, design and engineering activities.

Our project engineers and design engineers, (mechanical, automation, robotics, electronic hardware, embedded software, AI, ...) work on varied and exciting projects for the most diverse customers in machine building, healthcare, electronics, product development,...

At Verhaert, the employees in Kruibeke participate in the most diverse development processes, in which technology, functional and user-oriented design are integrated into new concepts and products.

### Job options

Verhaert On-Site Consulting is the perfect environment for mechanical designers, machine builders, electronic engineers hard- and software, mechatronics & automation engineers, junior project managers,...

You'll work on challenging projects in mechanical engineering, automotive, telecom, medical devices, applied electronics, equipment construction, ...

Verhaert is the playground of technology and innovation for AI and data science engineers, mechatronics engineers, product developers, mechanical designers, electronic designers, embedded software engineers, project engineers....

### Selection procedures

In a first interview we want to get to know you: as a person, an engineer, a developer

We get insights on your strengths, passions, ambitions and we match them with engineering opportunities at Verhaert and Consulting.

Potential match? In a second interview you share your experiences in depth with development projects, thesis, ... Are you the consulting type who fits our organization and vice versa is Verhaert your playground in technology and development?

Than the next step is a contract offer, financially but also your personal development plan by personal coaching and training.

## VeroTech

VEROTECH

### Contact

jobs@verotech.be

### Location

Vlaanderen - Limburg - Antwerpen - Luik

### Website

### Employees

Belgium  
70

Worldwide  
70

### Company Info

Founded in 2010 and based in Leuven, VeroTech has grown into a trusted Belgian engineering consultancy operating at the heart of the country's high-tech ecosystem. We are a fast growing company specialized in consulting and engineering services for high-tech R&D projects. We are on top of the most challenging project opportunities in mechanics, electronics, mechatronics, embedded software and data science.

VeroTech consultants work in the world's finest technology companies and state-of-the-art R&D environments. They play a key role in innovation projects in the aerospace, space, automotive, telecom, nanotech, semiconductor, medical devices sector and many others.

At VeroTech, you'll find much more than a workplace: you'll discover a dynamic community of engineers, driven by curiosity.

### Job options

VeroTech offers a wide variety of job opportunities for engineers and technical professionals at different stages of their careers. Our open positions include roles such as software and embedded software engineer, electronics engineer, mechanical and mechatronics engineer, test and validation engineer, data or AI engineer, and process or application engineer.

We support both junior and experienced profiles.

### Selection procedures

The selection process for candidates consists of three clear steps.

First, a telephone screening takes place, during which the candidate's background, motivation, and overall suitability are discussed. This is followed by a technically oriented interview via Microsoft Teams, where technical knowledge, experience, and problem-solving skills are explored in more depth. Finally, meetings with clients are organized, allowing the candidate to present themselves within a concrete project context, while both the technical and personal fit are evaluated.

## Company Info

Our mission is to contribute to a better world by providing industrial clean energy solutions worldwide. With over 100 years of experience and craftsmanship in the field of combustion technology, we deliver tailor-made solutions, turning biomass & industrial waste into energy, to all industries and energy providers.

We are energized by entrepreneurship, innovation and sustainability. We are driven by customer intimacy. We serve global customers through a regional presence with specialized project teams. We offer high-end technology solutions and services while spreading our risks over regions, company sizes, different fuels, markets... All of this comes together in a company culture with a strong family feeling – an environment that is defined by "JEUNEN".

## Job options

Engineering is in our blood. We have engineers in project management, site management, engineering, automation, sales and customer service. Besides this, R&D is the driving force behind our technology. So...you name it and we have an engineering position for it !

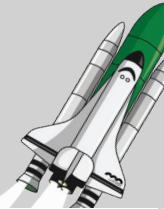

We are happy to listen to your expectations in order to define the right fit for you within VYNCKE !

## Selection procedures

We want to reach out to engineers with an invested interest in a more sustainable and healthier world, who are looking to thrive in an environment of learning and development. Check out our website and discover our job openings across the world.

**Website**

**Employees**

**Belgium**  
11

**Worldwide**  
11

## Company Info

We are is a custom software engineering company. We build tailor-made applications for the biggest challenges and boldest ideas.

Based in Ghent, our team creates digital solutions that are built to last and tailored to our clients' exact needs. Instead of staying on the sidelines, we dive right into understanding their challenges, thinking along to build software that fits perfectly.

What sets us apart: we cut the bullshit. We take a no-nonsense approach rooted in transparency and commitment, viewing code as a true craft. We take pride in going the extra 5%. It's those final details that take a project from 'good' to 'exceptional'.

## Job options

- Junior software engineer
- Software engineer intern
- Experienced software engineer

## Selection procedures

- Don't hesitate and reach out to us. Don't doubt yourself, be bold.
- Writing cover letters sucks, especially when the only thing you wrote last year was code. So no extended cover letter needed, just your CV.
- We start with a 20-minute preliminary phone call. That way we can align expectations and check if we're on the same page.
- You will be invited for an initial 1 hour conversation. We want to get to know you and assess if there's a cultural fit. No stress, just be you.
- After that, you'll be invited for a second interview in which a technical screening will take place.

Belgium

230

Worldwide

750

### Company Info

galtitudes is an international frontrunner in digital business transformation and consultancy, with over 750 colleagues across 9 countries. As a Microsoft Inner Circle member and Scale Fast Partner, we deliver real value in ERP, CE, BI & AI, Document Management, PLM, IoT, AR, CAD, and eCommerce. We are an end-to-end implementation partner, helping clients in manufacturing, distribution, and services achieve sustainable results by guiding them from strategy through implementation.

Starting September 2026, our Young Potentials Academy launches: a fully immersive learning program for ambitious master's students in Business Engineering, Business Economics, and IT, focused on technology, business, and personal growth to jumpstart their careers.

We are ready to reach new heights... Are you?

### Job options

For junior profiles, galtitudes offers a variety of opportunities. You'll start in our Young Potential Academy, an intensive learning program where you, together with other Young Potentials, will master all the ins and outs of the field. After 3 months, you'll be ready to shine in your role as a Junior Functional Consultant. Possible career paths include:

- Junior Microsoft Dynamics 365 Supply Chain Management Consultant
- Junior Microsoft Dynamics 365 Finance Consultant
- Junior CE Consultant
- Junior BC Consultant

All roles are fully detailed on our job site, so feel free to take a look.

### Selection procedures

At galtitudes, it's not just about experience or degrees, it's about you as a person. We believe in a people-focused, personal, and transparent selection process.

First conversation with the recruiter

Casual and approachable; we get to know you and talk about your motivations and interests.

Second conversation with the business

Meet your team and manager. Together, we explore whether there's a good fit for the role.

Positive outcome? A clear offer follows quickly, including benefits such as an electric company car from day one.
