

Be part of our energy

Location: Antwerp, Zwijndrecht, Meerhout

Graduate Engineer - Belgium

We are looking for talented engineers!

In the Antwerp Area we are offering job opportunities for Process Engineers. In this role you ensure the operation of a manufacturing unit and strive for optimal efficiency, cost effectiveness and operational safety. A next step may be the technical ownership of another process unit, a “coordinating” position such as checking and managing energy consumption in the entire manufacturing site or a commercial/business role.

You have / are:

- 5 year university education MSc Engineering Science (Chemical, Materials, Mechanical, Electrical, Energy, Applied Physics) and Bioscience Engineering (Chemistry & Bioprocess Technology, Catalytic Technology).
- fluent in Dutch and English
- strong analytical, problem solving and communication skills
- well organized and able to manage multiple tasks
- proactive, with an ability to anticipate, identify and resolve potential issues
- effective leadership skills, including influencing with no direct formal authority
- strong interpersonal skills and ability to collaborate with people from various backgrounds in developing innovative solutions
- broad career interests and international mindset

This awaits you ...

We offer a wide range of benefits including competitive pay, team mates who support and inspire you, the flexibility to explore multiple challenges and roles. Your development never stops. A variety of job roles and access to cutting-edge training let you expand your potential throughout an entire career. At ExxonMobil we have your back. We want you to enjoy a career with us. That’s why we provide the safest workplace we can, so you can work with focus and peace of mind.
