## Vacancy 'Product Assurance Manager'

**QinetiQ Space, located in Kruibeke, develops scientific experiments for research in space focused on the International Space Station and other microgravity environments.**

**QinetiQ Space is also active in the development of satellites and equipment thereof.**

**We wish to strengthen our team with a "Product Assurance Manager".**

### **Job description:**

At project start-up, your initial focus will be the translation of the customers' product assurance, quality and safety requirements into a specific, pragmatic approach for the project.

You will then monitor the implementation of this approach during the different development phases, including design, manufacturing, integration, test and delivery. These activities are quite diverse and will include subcontractor monitoring, non-conformance handling, performance of dependability analyses, hardware inspections, participation in formal customer reviews, support to test campaigns etc.

As the projects' product assurance manager, you will also interface with the customer and provide him/her with regular reporting on the performed activities.

In addition to the above responsibilities at project level, you could be assigned to company level improvement projects within our EN9100 Quality Management System.

### **Desired skills/ experience/ knowledge:**

We expect candidates to have a master degree in engineering. The ideal candidate would be an enthusiastic result-oriented and fast-learning team player with good communication skills at all levels. Fluency in English and Dutch is an absolute must.

A first experience in a related field would obviously be an asset, although specific coaching with regards to aerospace quality/safety/dependability requirements is foreseen.

### **Offer:**

The high tech aspects and variety of work makes working at QinetiQ Space an exciting challenge. QinetiQ Space offers you a unique opportunity to fully develop your talent and prove yourself at the top of the high tech industry in Flanders. An interesting function in a team of enthusiastic and inspiring colleagues is waiting for you.

### **Work location:**

*QinetiQ Space Kruibeke, Belgium.*
