With more than 425,000 people serving clients in more than 120 countries, Accenture drives innovation to improve the way the world works and lives. Visit us at www.accenture.com.

Your role

Accenture Digital Technologies is looking for **Young Graduates** with an **affinity in data, Business Intelligence and/or AI**.

In the age of Digital transformation, demand is growing rapidly. You will be on the forefront of the client interaction: shaping and delivering the solution that best meets our client needs, in the areas of Customer Relationship, Risk Management, Finance, Performance Management and Supply Chain, across all industries: Financial Services, Pharma and Health Care, Telecommunications, Products, Resources and Public Services, …

You will bridge the gap between Business and IT with a keen sense of client service, relationship building, innovation and relentless pursuit of high quality. Your common tasks will include analyzing data to create insights and visualizations, developing data models, setting-up the appropriate architecture and performing data transformations. You will receive appropriate training and support to succeed in your role within Digital Technologies.

Your responsibilities

As a young graduate in Digital Technologies, specific responsibilities may include:

- To participate in the full lifecycle of a BI project: from gathering and understanding the end-user needs and preparing the use cases over functional design, architecting the solution, supervising the technical design, to preparing and executing (real-life) test cases before handover;
- To collaborate with the client to discover and understand the availability and quality of data;
- To identify relevant data and to use it within the data platform (exploration, reporting, analysis);
- To build and maintain the client relationship within IT or the business;
- To work in an agile environment

We are seeking for highly motivated individuals who meet the following criteria:

- Bachelor and/or Master degree
- Proven success in contributing to a team-oriented environment;
- Ability to apply an analytical, creative and detail-oriented thought;
- Solid verbal and written communication skills in English, Dutch and/or French;
- Excellent leadership, communication (written and oral) and interpersonal skills;
- Readiness to travel in Belgium and abroad with varying intensity;

For the more technical roles, it is a plus if you have knowledge on or are motivated to learn one or multiple of the following technologies: SQL, Python, the C family (C, C++ and/or C#), ETL tools (e.g. SAS DI, SSIS, IBM Datastage, Abinitio, etc.), SAS, SAP BI (BW, BO), Oracle, IBM Watson… In short, any tool that can be used to manipulated and transform data.

Your future working environment

Digital Technologies is part of the Technology entity and aims at providing and delivering digital technologies to our client, mixing New IT and functional Business Intelligence knowledge. DT is all about data. Analysis and creation of data solutions are part of our daily tasks. Through functional analysis, we translate our client digital transformation strategy into concrete IT requirement. In a further stage, our technical experience and our new technologies focus allow our clients to grow, to become more competitive and a more successful business. In short – we create BI.

By joining Accenture, you will make great ideas happen for some of the world's most dynamic companies. With broad global resources and deep technical know-how, we collaborate with clients to cultivate ideas and deliver results. Choose a career at Accenture and enjoy an innovative environment where challenging and interesting work is part of your daily life. Not only will you get a bigger stage to perform on, you will also get recognition for excellent work and compensation in line with your performance.
