The Big Picture

At Televic Healthcare, we are at the forefront of revolutionizing healthcare through cutting-edge communication and information technology. We specialize in designing, developing and manufacturing innovative solutions that enhance patient care, streamline processes and empower healthcare professionals. We work in a channel model through certified partners internationally and our ambition is to become the reference in our niche market through innovation.

But for our technology to enable our customers to excel, we need a curious Embedded Engineer. You will be part of our international healthcare team, developing our next generation nurse call system for hospitals and nursing homes.

Besides that, technological leadership and innovation drive everything that we do. So join us and discover the healthcare communication technology of the future!

Working as an Embedded Engineer

- ✓ Write software for our wired and wireless devices
- ✓ Develop for both embedded Linux and bare metal devices
- ✓ Propose your own designs and review those of your peers
- ✓ Deliver software according to the quality standard defined by the team
- ✓ Actively take part in all SCRUM related meetings, sharing your own thoughts and insights

About you

- ✓ You have a Master Degree in Electrical Engineering, Computer Science or a related field
- ✓ You have skills in developing OOP applications with C++
- ✓ Experience with Linux is a plus
- ✓ Experience with bare metal development is a plus

What's in it for you?

- ✓ The chance to work on state-of-the-art products in a market that represents sustainability;
- ✓ A full time contract (38 hour week) at a company that has international success, but remains solidly rooted in Belgium as it keeps on growing;
- ✓ An attractive salary, supplemented with other legal benefits;
- ✓ An environment driven by teamwork and the constant will to innovate;
- ✓ The chance to deliver quality, because that's what we stand for;
- ✓ A stimulating, no-nonsense mentality, with an eye for your unique talents and growth.
