

Robonext is looking for a junior RPA consultant

Robonext is an innovative and ambitious service provider specialized in Smart Business Automation. We implement software robots for automating repetitive business processes. The technology we apply is Robotic Process Automation, one of the fastest growing software segments in the field of Artificial Intelligence. Robonext has the ambition to become market leader in RPA services in Western Europe.

RESPONSIBILITIES

- Through interaction with our customers, you will generate a thorough understanding of their business processes and requirements
- You will come up with the best possible solution for our customers' needs in accordance with robonext best practices
- You will develop RPA robots making use of software tools like UiPath and Automation Anywhere
- You will test and troubleshoot your RPA robots
- You train end users and coach them to do their own development
- You will provide support and maintenance on existing automations

REQUIREMENTS

- You aspire to be a developer and have coding experience
- You are able to express yourself fluently in English, Dutch and/or French
- You take ownership of your work
- You are eager to learn
- You are flexible and able to perform under time pressure
- You are interested to work on various projects in various industry sectors
- You are interested to work on various projects both in Belgium and in neighboring countries

OUR OFFERING

- A dynamic fulltime job in an innovative, fast growing company
- A competitive salary package with fringe benefits
- A pleasant working environment where initiative is appreciated
- Lots of opportunities for growth and international mobility
