# Dataroots

At dataroots, we are passionate data-specialists that strongly believe in the power of team! The work we do is rooted in our values: we strive for **R**evolutionary designs and implementations, we are **O**wner of our work and are at all times **O**pen about it. We create and evolve in a **T**rustworthy environment and that leads us to **S**imply striking and having an impact together. Our **ROOTS** enable us to deliver awesome solutions with a strong focus on DataOps and MLOps. Robust and production-ready implementations are an essential part of our job.

Dataroots is a scale-up from Leuven that researches, designs and develops robust AI-solutions & platforms for various sectors. We also have an office in Ghent (2022) and co-working spaces in Brussels and Charleroi. These locations are always available for brainstorm sessions or team events. Our languages? Python, Scala and HCL. What we speak when we're not coding? English, because, with colleagues from Mexico or France, you'll enter an inspiring and internationally focused team.

The RootsAcademy: curriculum

Onboarding and Landscape Overview
- Consultant skills
- Onboarding
- Back to basics

Data Engineering
- Distributed computing
- Orchestration
- CI/CD

Cloud Native
- Cloud architecture
- 3 main clouds

Machine Learning, MLOps & Infrastructure
- Modelling
- MLOps
- Data Lakes & DB
- Infra-as-code

Fun & great colleagues, team event and support

Machine Learning Engineers

Data & Cloud Engineers
