

JOB POST

Software Engineer - Internship

Keysight Technologies, Inc. is a leading technology company that helps enterprises, service providers, and governments accelerate innovation to connect and secure the world. Keysight's solutions optimize networks and bring electronic products to market faster and at a lower cost with offerings from design simulation, to prototype validation, to manufacturing test, to optimization in networks and cloud environments. Customers span the worldwide communications ecosystem, aerospace and defense, automotive, energy, semiconductor and general electronics end markets.

At Keysight, we help companies address their toughest challenges with precision and confidence. We offer the most precise electronic measurement tools in the industry, with advanced software to match. Our employees leverage their insight and passion to revolutionize electronic measurement and make a difference in the world. Keysight's PathWave Software Solutions division is market leader and technology innovator in the EDA (Electronic Design Automation) industry.

We are looking for a Software Engineer Intern.

- You will work on a versatile and practical engineering problem space, ranging from state of the art simulation technologies for high frequency designs deployed in cell phones, base stations, radars, intuitive user interface design, 2D/3D graphing capabilities, to infrastructure modules.
- You will obtain hands-on experience on multiple OS platforms like Windows and Linux.
- You will work directly with our highly successful and effective software development team that utilize modern software engineering techniques

Location: Gent, Belgium

Full Time Internship

Recruiter: Marta Jankowska – talent.europe@keysight.com

Join some of the brightest minds in the world of electronic design and test.

Keysight Technologies is an equal opportunity employer.

Job ID: 35581
