

# Internship JavaScript Development

Codify is a young company from Affligem, specialized in developing innovative apps. We help companies, mostly startups, building high-interactive web applications, from backend to user interface. Codify is the place to be for enthusiastic and passionate people who want to develop the best complex digital solutions.

## About this job

Looking for an internship closely guided and coached by our kick-ass team and under the supervision of one of our talented engineers? Eager to become a “hidden gem” in the world of software development and looking for a brilliant start of your professional career (you won’t be the first one that sticks around...)? You’re at the right place!

During your internship, you will collaborate with our young and enthusiastic team on the development of applications (web/native/server). Hereby you will learn to use Agile-methods, from sprint planning to project tracking. Further you will learn to use contemporary software development tools (Gitlab, JIRA, Confluence, SourceTree/Git) and JavaScript technologies such as Vite, TypeScript, ESLint and Visual Studio Code. You will learn how to prevent growing pains by consistently following best practices such as coding documentation, software testing and preventively refactoring.

## Our mission

We strongly believe in web and IoT and are fully convinced that the technological evolution has just begun. As leaders, we try to make the web more accessible to contribute in the way we live, communicate, work and play. More specifically, we use the latest JavaScript-technologies (React.js, React-Native, Node.js, TypeScript, GraphQL, Relay, Angular2...) to build web as well as native applications with a strong visual identity and an optimal user experience, perfectly tuned to the needs of the end user.

## Requirements

### Basic requirements to be able to become our intern: \*

- You study towards a bachelor degree (or higher) in the field of informatics.
- You wish to do a web development internship as part of these studies (so, not a BIS or IBO).
- You are able to provide an internship agreement via your college or university.
- You are fluent in Dutch and proficient in English.
- Are ready to work on-site in Affligem.
- Have an EU, EEA or Swiss citizenship or have a work permit valid in Belgium.

*\* We do not respond to applications that do not meet these basic objective requirements.*

### Other requirements:

- You unify with our mission of reinventing the connected world.
- You identify with our core values.
- You have a basic understanding and deep interest in Node.js, React, JavaScript/Typescript, Git...
- You are open to working in projects that use alternative technologies such as .NET or PHP.

## Let's talk!

Interested? Feel free to take a look or respond through our website at <https://codify.be/en/careers> or contact us via [jobs@codify.be](mailto:jobs@codify.be). Please send us your resume and tell us more about your portfolio with recent work you will be able to showcase when visiting us. We don't need a motivation letter.
