

Who are we?

IKOS, the technology consulting company specialized in railway and energy, holds 17 offices in 9 countries (France, Belgium, Spain, Italy, Germany, Switzerland, UK, US and Canada). Today, over 950 engineers work for our company on large-scale railway and energy projects internationally.

IKOS consultants' expertise and skills span across the entire railway industry, including signalling, rolling stock, low voltage and telecoms, energy and high voltage, and infrastructures and tracks.

IKOS: an international, human-sized company with competences in RAIL AND ENERGY

IKOS GROUP's high-calibre internal training programs will enable you to evolve within our company and to build up your professional career path, both by responding to your expectations and offering you projects matching your ambitions.

Join us! Integrating IKOS means accelerating your career, participating in some authentic human experience and realizing your professional goals in a competitive and highly technological sector.

Trainee in Railway Infrastructure

Your role:

NOTE: This internship position can be offered in Belgium as well as in several locations in France.

During your internship you will support the Project Leader/ Site Manager/ Project Engineer in the realization of railway (tracks, ballast, catenary, signalling...) projects. Your tasks include helping our colleagues with:

- SPOC on site: follow-up, coordination
- Organize site in efficient and qualitative manner
- Order and supply of needed materials, tools,...
- Solve technical issues
- Inform, motivate and lead the site team
- Interface with the customer
- Negotiations, monitoring for scope/cost/schedule changes
- Project planning, definition of milestones, planning and budget monitoring
- Define, review and adjust strategies of the project as required to meet deadlines and contractual commitments
- Communication of project expectations to the team members and stakeholders
- Deliver project reports, progress reports, change proposals, and presentations to the management and internal/external entities
- Supervise and motivate the project team members
- Responsible for the delivery to the customer

Your profile:

- You're currently following a master's Degree in Electromechanical, Civil, Construction, or Electrical engineering

IKOS fait partie des entreprises d'avenir où il fait bon vivre et travailler.

- Excellent communication skills (professional and concise)
- **Good knowledge of Dutch (≥B2)**
- You have a results-oriented mindset
- You like a practical and hands-on way of working
- Open to work occasionally, in case of important/interesting project activity, during night or weekend.

If you are interested in this type of challenge, please contact us for further information.
